               Forms, ANNEXURE
TRIPURA BUILDING RULES—2004

1. PART—1

Preliminary

1. Short Title, application and Commencement :

(1) These rules may be called the Tripura Building Rules, 2004.

(2) Except as otherwise provided in these rules, they shall apply to buildings in the Municipal areas/Nagar Panchayats, Notified areas and Industrial townships in Tripura.

(3) They shall come into force on the date of their publication in the Official Gazette.

2. Definitions,—

(a) In these rules, unless the context otherwise requires,—

(1) the "Act" means the Tripura Municipal Act, 1994;

(2) "addition to a building" means addition to the cubic content or to the floor area of a building;
(3) "area", in relation to a building, means the superficies of a horizontal section thereof made at the plinth level, inclusive of the external walls and such portion of the party-walls as belongs to the building;

(4) "advertising sign" means any surface of a structure with characters, letters, illustrations or illuminations applied thereto and displayed in any manner whatsoever to public view for the purposes of advertising or giving information regarding, or for attracting the notice of the public to, any place, person, public performance, article or merchandise whatsoever, and whose surface or structure is attached to form a part of, or is connected with, any land or building, or is fixed to a wall, hoarding, frame, post, kiosk, tree, structure, ground or fence, or is displayed in space or on screens;

(5) "air-conditioning" means the process of treating air so as to control simultaneously its temperature, humidity, cleanliness and distribution to meet the requirement of conditioned space;

(6) "alteration" means change from one occupancy to another, or a structural change, such as an addition to the area or height or the removal of part of a building, or any change to the structure such as the construction of, cutting into or removal of any wall, portion, column, beam, joist, floor or other support, or a change to the fixture or equipment;

(7) "apartment" means part of a property having a direct exit to a street or a passage or to a common area leading to such street or passage which together with its undivided interest in the common areas and facilities forms an independent unit;
(8) "applicant" includes a duly authorised agent of the applicant;

(9) "Architect" means a person who is registered as an Architect by the Council of Architecture under Architects Act, 1972 (20 of 1972); An Architect for the purpose of rule 17 shall be an Architect with two years experience under the Architect Act, 1972 (20 of 1972)

(10) "basement or cellar" means the lower storey of a building partly or wholly below the ground level or the abutting road level, whichever is higher;

(11) "building" means any structure for whatsoever purpose and of whatsoever materials constructed and every part thereof whether used as human habitation or not and includes foundation, plinth, Walls, floors, roofs, chimneys and building services, fixed platforms, veranda, balcony, cornice or projection, part of a building or anything affixed thereto or any wall enclosing or intended to enclose any land or space (other than a boundary wall not exceeding permissible limit as specified in these rules) and signs and outdoor display structures, tents, temporary hospitals (with other than temporary structures), shamiana, turpentine shelters etc. erected for a temporary and ceremonial or festive occasion with the permission of the Authority shall not be considered as building;

(12) "building plan" means a plan accompanying a notice for sanction, or provisional sanction, for erection or re-erection, or addition to, or alteration of, a building;

(13) "building services", in isolation to a building, means lighting and ventilation, electrical installation air-conditioning and heating, acoustics' and sound...
insulation, installation of lifts and escalators, water supply, sewerage and drainage, gas supply, and telephone installations;

(14) "chajja or cornice" means a sloping, horizontal or structural, overhanging usually provided over opening an external walls to provide protection from the sun and rain;

(15) "chimney" means the construction by means of which a flue is formed for the purpose of carrying the products of combustion to the open air, and includes, chimney stack and flue pipe;

(16) "commencement of work", in relation to a building, means the actual commencement of a building foundation work or erection or re-erection or alteration of a building including foundation, but does not include mere excavation of earth;

(17) "courtyard" means a space permanently open to the sky, enclosed fully or partially by building, whether or not at ground level or any other level within, or adjacent to a building, or a courtyard enclosed on all sides (being an inner courtyard) or a courtyard where one of the sides is not enclosed (being an outer courtyard);

(18) "covered area" means the horizontal area covered by a building immediately above plinth level on any floor, but does not include the spaces exempted under these rules and the space covered by—

a. garden, boundary, wall and wall structure, plant nursery, water pool, swimming pool (if not covered), platform round a tree, tank, fountain or bench,
b. drainage, culvert, conduit "septic tank" or sock pit,
c. compound wall and gate, and area covered by chajja;

(19) "cul-de-sac", means a public or private street or passage closed at one end with provision for turning of cars;

(20) "dangerous" in relation to a building which, by reason of its age, inadequate maintenance, dilapidation, abandonment or by any other reason, has become structurally unsafe or is not provided with adequate means of access or which constitutes a fire hazard, dangerous to human life;

(21) "depth", in relation to a plot, means the distance from the front to the rear line of the plot.

(22) "drain" includes the sewer, a house drain, a drain of any other description, a tunnel, a culvert, a ditch, a channel and any other device for carrying off sullage, sewage, offensive matter, polluted water, rain water or subsoil waters;

(23) "drainage" means the removal of any liquid by a system provided for the purpose;

(24) "dwelling unit" means an independent unit with separate living, cooking and sanitary facilities;

(25) "engineer" means a person having a degree in civil engineering of a recognised university or institute;

(26) "floor" means, unless otherwise specifically provided in the rules, the lower surface in a storey, after the finishing of which one normally walks in a building;

(27) "floor area" means the covered area of a building at any floor level;
(28) "Floor Area Ratio" or "F.A.R." (being the abbreviation of the whole words "Floor Area Ratio") means the quotient obtained by dividing the total floor area of all the floors of a building by the area of the plot, formula being as follows:

\[
\text{F.A.R.} = \frac{\text{Total floor area of all floors}}{\text{Area of the plot}}
\]

(29) "Form" means a form appended to these rules;

(30) "framed building" means a building where the dead load and superimposed load are transferred to foundation through framed members with rigid joints, which may be of R.C.C. prestressed concrete, steel, timber, or the like, such members at the transfer of loads being not only experienced with directional stress but also bending stress and sheer stress as well;

(31) "geo-technical engineer" shall mean an engineer having at least 2 years experience in soil and foundation engineering;

(32) "ground coverage" means the quotient obtained by dividing the area of the plot covered by the building at the ground level by the total area of the plot expressed as a percentage as follows:

\[
\text{Ground Coverage} = \frac{\text{The area of the plot covered by building}}{\text{Total area of the plot}} \times 100
\]
Explanation. - For the purpose of calculating the ground coverage, all projections and overhangs shall be included in the covered area excepting cornice, weather shade or chajja of not more than 0.50 metre in width;

(33) "ground level" means the average level of the centre line of the street or passage to which the plot abuts;

(34) "habitat room" means a room occupied or designed for occupancy by one or more persons for study, living, sleeping, eating, cooking, if is used as a living room, but not including bath-room, water-closet, compartments, laundries, serving and storage pantries, corridors, callers, attains and spaced that are not used frequently or during extended period;

(35) (1) "height of a building" shall mean vertical distance measured from the average level of the centre line of the adjoining street or passage on which the plot abuts to the highest point of the building, in case of a flat roof and in the case of sloped roofs, the midpoint between the cave's level and the ridge.

(2) "for hill areas, the vertical distance shall be measured from the lowest floor level instead of average ground level as applicable in case of planning;

(36) "Heritage Building", means a building of one or more premises or any part thereof, which requires preservation and conservation for historical, architectural, environmental or cultural purpose, and includes such portion of the land adjoining such building or any part thereof as may be required for fencing or covering or otherwise preserving such buildings and also includes the areas and buildings requiring preservation and also conservation for the purpose as aforesaid.

(37) "house" includes any hut, shop or warehouse;
"hut/mud wall" means any residential building which is constructed principally of mud, leaves grass or thatch or such easily perishable materials and of a temporary nature;

"khatal" means a place where cattles are kept or maintained for the purpose of trade or business in cattle or business in milk;

"ledge" or "tand" means a shelf-like projection supported in any manner except by means of vertical supports, within a room itself but not having projection wide than 0.60 metre, for being used only as storage space;

"loft" means an intermediary floor between two floors or a residual space in a pitched roof above normal floor level which is constructed or adopted for storage purposes;

"means of access" means a public or private street or passage open to the sky as shown in the survey map or other records of the local body and includes a passage which may not be open to the sky in the case of partition of an existing building,

"mezzanine floor" means an intermediate floor between any two floors;

"natural Hazard" – The probability of occurrence, within a specified period of time in a given area, of a potentially damaging natural phenomenon.

Natural Hazard Prone Areas – Areas likely to have (i) moderate to very high damage risk zone of earthquakes, OR (ii) moderate to very high damage risk of cyclones OR (iii) significant flood flow or inundation OR (iv) one or more of these hazards.
Note: Moderate to very high damage risk zones of earthquakes are as shown in Seismic Zones III, IV and V specified in IS: 1893; moderate to very high damage risk zones of cyclone prone are those areas along the sea coast of India having wind velocities of 38m/s or more as specified in IS: 875(part 3); and flood prone areas in river plains (unprotected and protected) area indicated in Flood Atlas of India prepared by the Central Water Commission. All three hazard prone areas are redrawn in Vulnerability Atlas of India on large scales. Besides, other areas can be flooded under conditions of heavy intensity rains, inadequate drainage, etc. as identified through local surveys in the Development Plan of the area.

(45) "open space" means an area, forming an integral part of the site, at the ground level open to the sky;

(46) "parapet" means a low wall or railing built along the edge of a roof or a floor;

(47) "parking space" means an area enclosed or unenclosed, covered or open, sufficient in size to park vehicles with a driveway connecting the parking space with a street or alley and permitting ingress and egress of vehicles;

(48) "partition wall" means an interior non-loaded bearing wall of storey or part-storey height;

(49) "party wall" means one wall forming part of a building and used or constructed to be used for the supports and separation of adjoining buildings to different owners or constructed or adopted to be occupied by different persons;

(50) "passage" means a means of access which may not a private or public street and which provides access to not rare than three plots, and includes
footway and drains attached to the passage and also includes all lands up to the
property line of the plots abutting the passage;

(51) "plinth" means the part of a wall or structure between the ground level
and the level of the lowest floor of a building above ground level;

(52) "promoter" means a person who constructs or caused to be
constructed a building on a plot of land for the purpose of transfer of such building
by sale, gift or otherwise to any other person or a company, co-operative society
or association of persons and includes
i. his assigns, if any,
ii. the person who constructs, and the person who transfer by sale,
gift or otherwise, the building, if, the two are different persons;
iii. any Board, Company, Corporation, Firm or other association of
persons, established by or under any law for the time being in
force;

(53) "purchaser" means any person who, enters into an agreement with the
promoter for the purchase of a dwelling units;

(54) "Registrar" means the Registrar as defined in the Tripura Co-operative
Societies Act.

(55) "section" means a section of Act;

(56) "services" in relation to a building, means lighting and ventilation,
electrical installations, air-conditioning and heating, acoustics and sound
insulation, installation of lifts and escalators, water supply, fire fighting, sewerage
and drainage, gas supply and telephone installations;

(57) "service rooms" means, rooms and covered spaces meant primarily
for purposes other than human habitation, service rooms may be used for
parking, air-conditioning plant room or room for the other machines used for any
building service or for the other purposes space for a stand by generator for
power supply, storage space for household or other goods of non-inflammable
nature, strong room or bank cellar and dark room;
"set back line" means a line usually parallel with the centre line of a road or street, laid down by a competent authority beyond which nothing can be constructed towards the roads;

"shed" means a light or temporary structure for shed or shelter;

"site" means the entire area covered by a building with out-houses, and includes the land at the front or in the sides of, and pertaining to, such building and the land required by regulations to be left open;

"structural engineer" shall mean an engineer with at least 2 years experience in structural designs;

"to construct a building" with its grammatical variation means-

i) to construct a new building, or

ii) to re-construct a building, or

iii) to convert a building or any part of a building, not being a flat or block, into a flat or blocks;

"to erect a building" has the same meaning as in sub rule 62 of rule 2;

"tenement" means an independent dwelling unit with a kitchen;

"use group" or "occupancy" means the purpose for which a building or a part of a building is used or intended to be used.

Explanation.- For the purpose of classification of a building according to occupancy, an occupancy shall be deemed to include subsidiary occupancies, which are contingent upon it. The occupancy classification shall include residential, educational, Institution, assembly, business, mercantile (retail), mercantile (wholesale), industrial, storage and hazardous occupancies. Principal occupancy shall be the occupancy of covering more than 50% of the floor area of the building. In case no single occupancy covers more than 50% of the floor area of a building, it shall be classified as a building of "mixed use of occupancy". The classification of buildings, based on principal occupancy shall be as follows: -

(a) "residential building", that is to say, any building in which sleeping accommodation is provided for normal residential purpose as the principal use with or without cooking facility and/or dining facility. Such
building shall include one or two or multi-family dwelling, lodging or rooming houses, hostels, dormitories, apartment houses and flats, with private garages:

(b) "educational building", that is to say any building used for school, college, library or day-care purposes as principal use involving assembly for instruction, education or recreation incidental to education;

(c) "institutional building", that is to say, any building or part thereof ordinarily providing sleeping accommodation for occupants and used principally for the purposes of medical or other treatment or case of persons suffering from physical or mental illness, disease or infirmity care of infants, convalescents or aged persons and for penal or correctional detention in which the liberty of the inmates is restricted; such building shall include hospitals, clinics, dispensaries, sanatoria, custodial institutions and penal institutions like jails, prisons, mental hospitals and reformatories;

(d) "assembly building", that is to say, any building or part thereof where groups of people congregate or gather for amusement or recreation or for social, religious, patriotic, civil, travel, sports or similar other purposes as the principal use such building shall include theatres, motion picture houses, drive-in-theatres, city halls, town halls, auditoria, exhibition halls, museums, skating rings, gymnasiums, restaurants, eating houses, bars, hotels, boarding houses, places of worship, dance halls, club rooms, gymkhanas, passenger stations and
terminals of air, surface and other public transportation services, recreation places and stadiums;

(e) "business building", that is to say, any building or part thereof used principally for transaction business for keeping of accounts and records or for similar purposes; such building shall include offices, banks, professional establishments, court houses, if the principal function of such offices, banks, professional establishment, court houses, if the principal function of such offices, banks, professional establishments, court houses is transaction of public business or keeping books and records; such building shall also include buildings or premises solely or principally used as an office or for office purpose;

(f) "mercantile building (retail)", that is to say, any building or part thereof used principally as shops, stores or markets for display of merchandise for retail sale thereof or for office and storage of service facilities incidental thereto;

(g) "mercantile building (wholesale)", that is to say, any building or part thereof used principally as shop, store or market for display of merchandise for sale thereof on whose sale basis, or for office and storage or service facilities incidental thereto, and shall include establishment, wholly or partly engaged in wholesale trade, manufacturers' wholesale outlets including related storage facilities, warehouses and establishments engaged in truck transport (including truck transport booking agencies);
(h) "industrial building", that is to say any building or structure or part thereof used principally for fabrication, assembly and/or processing of goods and materials of different kinds, such building shall include laboratories, power plants, smoke houses, refineries, gas plants, mills, dairies, factories and workshops;

(i) "storage building", this is to say, any building or part thereof used principally for the storage or sheltering of goods, wares or merchandise as in warehouses such building shall include cold storage freight depots, transit sheds, store houses public garages, hangers, silos and barns;

(j) "hazardous building", that is to say, any industrial or storage building or part thereof used principally for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity or which may produce poisonous fumes or explosions during storage, handling, manufacture or processing or which involve highly corrosive, toxic or noxious alkalise; acids or other liquids or chemicals producing flames, fumes, explosions or mixtures of dust or which result in the division of matter into fine particles subject to spontaneous ignition;

(k) "steel tower" includes the steel tower, having an height of 15 meters or above made for the purpose of telecommunication or other purposes;
Explanation :- Type of buildings not dealt with specifically under these rules shall be guided by the latest edition of the Codes of Bureau of Indian Standards;

(66)(a). "width of a street" means the whole extent of space, including the footpath, side drains etc. within the boundaries of the street as specified in the survey map or other records of a local body;

(b). Words and expressions used but not otherwise defined shall have the same meaning as in the Act.

(c). Definitions for the Special chapters (part - X, XI & XII):

(1) Hut: - Hut means any residential house which is constructed principally of leaves, grass or thatch or such easily perishable material and of a temporary nature;

(2) Mud wall: - Mud wall means any residential house which is constructed principally of mud (wholly or partly), leaves, grass or thatch or such easily perishable material the roof being corrugated sheet or polythin paper and will be of a temporary nature;

(3) "Non-ambulatory Disabilities:- Impairments that, regardless of cause or manifestation for all practical purposes, confine individuals to wheelchairs;

(4) "Semi-ambulatory Disabilities:- Impairments that cause individuals to walk with difficulty or insecurity. Individuals using braces or crutches, amputees, arthritis, spastics and those with pulmonary and cardiac ills may be semi-ambulatory;
(5) Hearing Disabilities: - Deafness or hearing handicaps that might make an individual insecure in public areas because he is unable to communicate or hear working signals;

(6) Sight Disabilities: - Total blindness or impairments affecting sight to the extent that individual, functioning in public areas is insecure or exposed to danger;

(7) Wheel Chair: - Chair used by disabled people for mobility. The standard size of wheel chair shall be taken as 1050 mm x 750 mm.

(8) Solar Assisted Water Heating System: - A device to heat water using solar energy as heat source;

(9) Auxiliary back up: - Electrically operated or fuel fired boilers / systems to heat water coming out from solar Water Heating System to meet continuous requirement of hot water;

(10) New Building: - Such buildings for which construction plans have been submitted to competent authority for clearance;

(11) Existing Building: - Such buildings, which are licensed to perform their respective business;

3. **Power to relax rules:** - Notwithstanding anything contained in these rules, a Municipality or other concerned authorities may, for reasons to be recorded in writing and with the previous approval of the State Government, relax any provision of these rules for dealing with a case in a just and equitable manner.
3A. "For provision not covered in the byelaws:- For requirement not specifically covered in this byelaw, the provisions of the National Building Code and other relevant Indian Standards formulated by the Bureau of Indian Standards (BIS) shall be followed."

3B. Repeal:- Any provision(s) or part thereof of these rules may be amended by the government. The total byelaw or part thereof, may also, if required, be kept in abeyance by the government.

3C. Savings:- For building(s) or part thereof constructed in urban areas, prior to the enforcement of these rules, shall not be disturbed or affected by any means of these rules.
4. **Criteria of using a piece of land as a building site.**

(1) No piece of land shall be used as a building site in Municipal area / Nagar Panchayat area unless the local body is satisfied that—

(a) land record is in conformity with the proposed construction and the plot of land is at least 100 sq. mt. in area for residential purposes and minimum 40 sq. mt. for business/other than residential purposes.

(b) the level of the land is not lower than the level of the approach road or the means of access on which the site abuts.

(c) the land is capable of being well-drained by means of drainage facilities leading to existing public drains of drainage channels;

(d) "the soil of the site should be capable of sustaining the construction and the building thereon under all conditions";

(e) where the site is within 5.00 meters of any side of a tank, the owner will take such measures as shall prevent any risk of drainage from such building passing into the tank;

**Explanation:** Soil will also include rocks, boulders, laterite, etc.
(2) No piece of land in the Nagar Panchayat / Municipal area located in a
sinking zone or central business area, as determined by the local bodies, shall be
used as a building site without prior approval of the State Government;
provided that for construction of any building on any piece of land in the
Nagar Panchayat/Municipality of the hill areas, prior investigation and testing of
soil by a Government recognized investigating and testing organization, in respect
of land shall be made;

(3) No piece of land where a closed, sick or other industry is located or is in
operation, shall be used as a site for construction of any building.

5. Applications for approval of Building sites:

(1) Every site plan, shall show or state on the body of the drawing of the site
plan the following:

(a) the boundaries of the site and of any contiguous land
belonging to the owner thereof with number assigned to
plot/premises;

(b) the position of site in relation to neighboring streets with
dimensions;

(c) the name of the street on which the site abuts;

(d) the position of the building and of all other buildings including
existing buildings (if any) which the applicant intends to erect
upon his contiguous land referred to in clause (a) in relation to

(i) the boundaries of the site and, in case where the site
has been sub-divided, the boundaries of the portion owned by 
the applicant and also the portions owned by the other 
owners, and 

(i) all adjacent streets, buildings and premises within a 
distance of 12.0 meters of the site and of the contiguous land 
(if any) referred to in clause (a);

(e) the use or occupancy of all the other existing buildings;

(f) the direction of North point;

(g) the means of access as per rules 46 and sub-rules thereon 
from the street to the building(s) and to all other buildings(if 
any) which the applicant intends to erect upon his contiguous 
land referred to in clause(a);

(h) the schematic position and approximate height and the 
number of storyes of all other buildings within 12.0 meters of 
the site;

(i) the free passage or way in front of the building;

(j) the width of the street(if any) in front and at the rear of the 
building;

(k) the means of drainage of the proposed building leading to 
existing public drains or drainage channels with their location 
in relation to the site;

(l) the means of drinking water supply to the proposed building 
indicating the source and the distance from the site including
the route through which the pipe line will be laid, if piped water supply is envisaged;

(m) the means of power supply to the proposed building on the site, indicating the route through which power supply will be achieved;

(n) “areas of cistress”;

(o) such other particulars as may be prescribed by the local bodies;

(p) the location of power-line, water line, sewer line, natural drainage channel/ghora road side drains, protective works;

(2) in case of a promoter submitting site plan/ building plan for approval, all provisions made in the Tripura Building Rules of 2002 shall apply;

(3) Every application made under Rule 5 shall be written on printed Form-A to be supplied by the Municipality/Nagar Panchayat on payment of an amount not less than Rs. 10/- only.

6 **Further information required to be submitted by applicant.**

Within 15(fifteen) working days from the date of receipt of an application for approval of building site, the competent authority may require the applicant –

(a) to furnish him with any information on matters referred to in these rules which has not already been given in the documents there under; or

(b) to satisfy him that there are, no objections which may lawfully be taken to the approval of the site.
7. Incomplete or defective information. —

(1) If any information or document required under these rules is, in the opinion of the Local Body, incomplete or defective, it may within 15 (fifteen) working days from the date of receipt of the same, require further information or documents to be furnished.

(2) If any requisition made under these rules is not complied with within 1 (one) month, the application for approval of the building-site may be refused.

8. Signature on approved site plan. —

When the competent authority has approved any site plan, the approved plan/ plans shall be signed by such officer as may be authorized in its behalf and in such manner as may be directed and two copies of approved site plan will be returned to the applicant.

9. Control of development of parks, public open space, ponds, wetlands, canals, river and other water front and brick fields —

(1) For the purpose of these rules, public open space shall mean any open space which is open to the use of enjoyment of the public, whether it is actually used or enjoyed by the public or not and whether the entry is regulated by any charge or not.

(2)(a) Generally, parks and public open spaces shall classified for the purpose of these rules into three following groups :-

22
(i) the parks and public open spaces with area to 1500 Sq.m. shall be termed as small park and public open space;

(ii) the parks and public open spaces with area more than 1500 Sq.m. but up to 7000 Sq.m. shall be termed as medium parks and public open spaces;

(iii) the parks and public open spaces with area more than 7000 Sq.m. shall be treated as large parks and public open spaces.

(b) The structure above ground level shall be subject to the following provisions:

No structure other than the following shall be permitted in parks and public open spaces;

(i) statue of public interest;

(ii) structure related to play equipments and fixtures;

(iii) structure related to public amenities provided that the height of such building shall not exceed 4.00 meters and that total area covered by such building shall not exceed 10% of the total of the small parks and public open spaces, 5% in the case of medium parks and public open spaces and 3% in the case of large parks and public open spaces.

(iv) Boundary wall with maximum height of 1.50 mt.

For the purpose of calculation of total area of parks and public open spaces, as aforesaid, the area of water body, if any, shall be excluded.

(c) The underground structure shall be subject to the following Provisions:

(i) no underground structure shall be allowed in small and medium park and public open spaces;
(ii) in large parks and public open spaces underground structure for amenities or parking facilities may be allowed, provided such structure shall not affect the environment or create traffic problem.

(3) No canal, pond, water body, wetland, river lets, jhora, water source, natural spring, streams, drains, culverts shall be filled up provided that after taking due consideration of the existing relevant Acts, the drainage slope, slip, landslide, ecology, culture, environment, pisciculture, fire fighting or any other material consideration and for reasons to be recorded in writing the Local Body with the prior approval of the State Government may allow any canal pond, rivulets, streams, rivers, flood plain area to be filled up.

(4) In the case of a building in the zone of river (within 15 metres from river bank) or other water fronts of large water bodies (more than 1300 acres),

(a) the maximum permissible height of a building in such zone shall be 5.00 metres. In the case of a building on stilts, the maximum permissible height of the building shall be 6.50 metres including the stilts, the maximum height of which shall be 3.00 metres - In such building the stilted portion shall not be allowed to be walled up or covered along the sides - in such situations the stilted portion should be suitably stiffened as per provision of IS 1893:2000 to resist code based earthquake forces.

(b) no building shall be more than 20.00 metres long alongside the river or other water fronts. There shall be a clear linear gap of 50.00 metres between the two buildings alongside the river or other water front;
(c) the maximum permissible covered area of such buildings shall be 200.00 Sq.metres;

(d) the structures for recreational purpose conforming to this sub-rule may be permitted within the adjoining land.

(5) Existing bricks fields shall be allowed to be continued as brickfields within their own boundaries. After being declared as abandoned, the excavated portions shall have to be maintained by the owner at his cost as water bodies where pisciculture or any type of recreational activity may be allowed.

10. **Sub-division of plots.**

(1) No sub-division of any plot within the Nagar Panchayat or Municipal area shall be undertaken without the prior approval of the Local Bodies.

(2) Generally—

(a) plot to be subdivided shall be termed as mother plot;

(b) sub-division shall not be allowed if the mother plot abuts a means of access having a width of less than 3.50 metres for plains;

(c) every individual plot obtained by sub-division of the mother plot shall abut a means of access having width of not less than 3.50 metres;

(d) the junctions of means of access within the mother plot shall be provided with splayed corners measuring not less than 2.50 metres on each side;
(e) these rules shall not apply to a scheme for Economically Weaker Section and Low Income Group Housing approved by the Government;

(f) sub-divisions may be allowed on the condition that the following facilities shall be provided by the owner at his own cost to the satisfaction of the Local Bodies:

i. drainage facilities with pucca drain ensuring drainage of each individual plot and of the means of access and passages leading to existing public drain or natural drainage channels;

ii. all weather means of access and related protective works, if necessary along with street lighting;

iii. street and passages along with street lighting;

iv. sanitary facilities including garbage disposal facilities;

v. water supply facilities;

(g) no permission for sub-division of a plot of land shall be granted unless each sub-divided plot is at least 100 Sq. metres in area for residential purposes and 40 sq. meters for other than residential purposes;

(h) no subdivision of a plot shall be granted unless a detailed layout plan of the area proposed to be sub-divided is submitted before the Municipality/Nagar panchayat duly integrating the site layout plan with the general use of the land in the adjoining areas.
The existing street pattern as also the other physical infrastructures facilities like drainage, sewerage, water supply, electricity supply with location of high tension or low tension electric line with poles also required to be shown.

(3) The maximum permissible length for the means of access shall be as given in the following table:

<table>
<thead>
<tr>
<th>Maximum length of the means of access</th>
<th>Width of means of access</th>
<th>For means of access closed at one end</th>
<th>For means of access open to street at both ends</th>
</tr>

</tbody>
</table>

(4) For mother plot measuring more than 5000 Sq. metres in area subdivision may be allowed, provided 8%(eight percent) the total area of the mother plot is developed as public open space. The width of each such open space shall not be less than 10.00 metres and each such open space shall abut a street.
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

having a width of no less than 7.00 metres. The minimum area of each such open space is one parcel shall be 400 Square metres. This open space shall be in addition to the land required for providing the means of access to the individual plots obtained by subdivision of mother plot.

(5) For mother plots measuring more than 25,000.00 sq. metres in area, sub-division may be allowed, provided seven percent of the total area of the mother plot reserved for facilities like school, health centre market, police outpost, milk booth, post office, power sub-station, transport terminal, water treatment plant, sewerage treatment plant and the like. Such land shall abut a street having a width of not less than 10.00 metres in addition to the land necessary for means of access and for open spaces mentioned in sub-rule(3).

11. **Delay in sanction or refusal of site plan.** –

(1) Where the sanction of the site plan is not accorded by the Local Bodies and no reason is assigned in this behalf, or where sanction is not refused within a period of 60 days from the date of receipt of the application in this behalf or receipt of necessary particulars, whichever is later, the applicant may make a representation to the chairperson of the Municipality/ Nagar Panchayat.

(2) Upon such representation, the Chairperson shall after causing such enquiry as he may think fit and after giving the applicant an opportunity of being heard, direct the Chairperson / Local Body to sanction the site plan either conditionally or unconditionally or refuse sanction stating reasons and...
communicate the same to the applicant within a period of 30 days from the date
of receipt of the representation under sub-rule (1).

12. Masonry building not to be erected without special permission in certain
cases.-

(1) Save with the special permission of the Local Body no building (other than a
hut) shall be erected unless –

(a) the site of such building abuts an a public street or a projected
public street or a private street duly sanctioned and constructed in
accordance with the provisions of the Act or any other law in force
immediately before the commencement of the Act; or

(b) there is access to the building from any such street by a passage
or pathway appertaining to such site, and not less than 2.40 metres
wide at any part,

(2) No building shall be erected so as to deprive any masonry or framed building
of the appropriate means of access,

(3) The following building shall be exempted from the operation of these rules –

(a) any building erected or intended to be erected by or with the
sanction of the competent authority for use solely as a temporary
hospital for the reception and treatment of persons suffering from any
infectious or contagious disease;

(b) any hoarding or like means of protection (other than a masonry
wall) which the owner of any premises certifies to the competent
authority, not less than seven days after erection to have been erected for the purpose of preventing threatened acquisition of any casement over his own premises or any portion thereof, provided, the stability of such hoarding or other means of protection is certified by the competent authority.

B. SUBMISSION OF BUILDING PLAN

13. Application to the chairperson with a building plan for permission to erect a new building or to make addition or alteration to a building.—

(1) No person shall erect a new building, or re-erect or make addition and / or alteration to any building or cause the same to be done without first obtaining a sanction from the Local Body under these rules.

provided that no such sanction is required to be obtained from the Local Bodies for—

(a) erection, re-erection, addition to or alteration of—

(i) an internal partition wall which does not violate any of the provisions of Act or these rules, or

(ii) a parapet wall or a cornice or chajja within the boundaries or the site and not overhanging a street, so however, that the total height of the parapet wall shall not be more than 1.50 metres and width of the cornice or chajja shall not be more than 50 centimeters.

(b) repairing of a staircase of lift-shaft.
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

(c) while washing or painting.

(d) re-flooring of the surface of an existing floor,

(e) re-conditioning of the surface of an existing floor, without changing the character and dimension of such roof, re-flooring of the surface of an existing floor,

provided that no such work as is referred to in clauses (a) and (c) shall be undertaken without giving the Local Bodies 15 (fifteen) days notice in writing giving the nature of work proposed to be undertaken;

(f) erection of a false ceiling in any floor for air-conditioning, lighting or decorative purposes;

(g) plastering and patch work;

(h) providing or closing, an internal door or window or a ventilator, not opening directly opposite a door or a window of another building;

(i) replacing or fallen bricks, stores or repairing of damaged pillars or beams;

(j) repairing or renewing existing plumbing service;

(k) carrying out such other work as is necessary in the opinion of the Local Bodies, for reasons to be recorded in writing, to maintain the building in a condition of good repair or to secure it to present danger to human life.

(2) Every person intending to erect a new building or to make addition and/or alteration to any building, shall apply to sanction giving notice in writing in Form B along with following :-

[31]
(a) copies of documents showing that the applicant has exclusive right to undertake such works;

(b) duly authenticated copies of receipts showing payment of tax to the Municipality/ Nagar Panchayat for the quarter previous to the date of application in respect of the land, building or portion thereof upon which the building is proposed to be erected, re-erected, added to or altered and a declaration from the Nagar Panchayat or Municipality stating that there is no arrear dues payable to the Municipality/ Nagar Panchayat;

(c) a declaration, stating the name, address and other particulars of Architect or Licensed Building, Structural Engineer etc. as the case may be, along with their consent, who are engaged as per rule 17;

(d) requisite number of copies of the drawings as stipulated in Rule 14;

(e) (i) certified copy of the approved site plan;

(ii) certified copy of the reports of tests for stability of slopes and for soil as per requirements in Rule 4 and such test report should also indicate the maximum load that can be transferred to the soil of the particular site safely;

(f) receipt of deposition of fees as specified in sub-rule(9) of Rule 14 of these rules; and

(g) in the case of steel towards, the authenticated copy of the relevant license issued by the Government of India or the State Government.
14. **Particulars to be furnished in, and with, an application.**

(1) Every application made under Rule 13 shall, be written on a printed form (to be supplied by the Municipality/Nagar Panchayat on payment of an amount not less than Rupees 10(ten) only or as may be determined by the Municipality / Nagar Panchayat for each such form) and shall state the location of the site, reference number of approval of the site plan, the number assigned to the premises in the assessment book and its dimensions, and such other particulars as may be specified by the Local Body.

(2) All site plans, building plans, elevations and sections shall be on drawing sheets which shall be in any of the sizes specified in the table below:

(5) The Plan of the building, elevations and sections according to the application shall be accurately drawn to a scale of 1(one) meter to 1(one) centimeter and coloured in the manner as laid down in Table 2 of rule-14.

(6) The Plans, sections (longitudinal and sectional) and elevations of building shall indicate-

(a) the floor plans of all the floors including roof plan together with the covered area;

(b) existing building and the basement plan, if any, the sizes of rooms and spacing of structural members, and their materials;

(c) the location of essential services, that is to say, water closet, sink, baths, septic tank and the like, and arrangement for drainage of sullage and other waste water disposal including sewer connection if any;

(d) the sizes of footings, the thickness of basement walls, other walls, floor and roof slabs, the construction materials, sizes and spacing of framing members, floor to ceiling heights with their materials, taking at least one fully dimensioned section (both longitudinally and crosswise) through staircase, bath and water-closed as well as such other sections as would clearly indicate the details of architectural features, mezzanine
floors, and lofts;
   (e) the front elevation and all other elevation from the abutting public streets;
   (f) the house drainage plan, and site drainage plan up to nearest Nagar Panchayat or Municipality or natural outfall;
   (g) the dimensions of all projected portions beyond the permissible building line;
   (h) the roof plan indicating the drainage and slope of the terrace;
   (i) the plans and details of private water
   (j) the details of breast wall, retaining wall or other protective measures, if any, which are required to be undertaken;
   (ii) no part of the proposed building shall be permitted to be erected directly over the retaining or other similar protective walls;
   (k) where structural design and/or soil/stability and similar other tests are necessary for a building under any provision of these rules, the copy of details or reports and/or recommendations of soil/stability/other tests and/or copy of details of calculating for structural design duly signed by the competent personnel as specified in Rule 17. Details structural drawings including reinforcement detailing should also be submitted.

(7) Doors and windows schedule shall show sizes of doors, windows, and frames.

(8) The plan in its headline shall indicate specifically:
   (a) the purpose of construction,
   (b) the name of the owner,
   (c) the name of the police-station, and
   (d) the name and jurisdiction list number of mouza and cadastral survey number of the plot or plots, of the site, if required;

(9) Every application shall be accompanied with an application fee of not less than
Rupees 10 (ten) only and not more than Rupees 30 (thirty) only as may be
determined by the municipality / Nagar Panchayat.

10. The nearest road of 3 m width or more with the pathway connecting the
road and the site should be shown in case of plot abutting roads less than 3 m.

15. **Specification and other information to accompany the application**
with building plan:-

Every such application shall further be accompanied by a brief specification
giving the following information :-

(a) the materials and method of construction to be used for external walls, partition
walls, foundations, roofs, floors, stairs, fire place and chimneys;

(b) the manner in which roof and house drainage and the surface drainage of the
site will be disposed of;

(c) the manner, if any, in which it is proposed to pave the courtyard and open space
in the building or premises and the scope to which the surface is to be made in
each case;

(d) the means of access that will be available for removal of nuisance;

(e) proposed occupancy or use of the building for ensuring conformity with the
provisions of chapter xiv of the Act;

(f) the area of plot, area of the plinth of the proposed and existing buildings if any,
and the area of open spaces left;

(g) the number and area of each tenement, the area put to different occupancy or
use group in all the floors of the proposed building including the same for
existing building, if any;

(h) safety measures proposed to be taken during the construction of the building;

(i) for buildings other than residential and educational buildings, the means of
ingress and egress of vehicles shall be indicated;

(j) the position of water tanks with sizes which shall have to be constructed
below ground or just above;

(k) the area of garage (if any);
(l) number of flats proposed to be built in each floor and total number of flats (if any);

(m) calculation of F.A.R.

(n) an indemnity bond in Form J in the case of building plans having provisions for deep foundation work, piling work, construction of basement or underground construction;

(o) first aid and other provisions for dealing with fire;

(p) such other particulars as may be determined by the Municipality / Nagar Panchayat having jurisdiction.

(q) A certificate undertaking design for hazard safety in Form B-A;

16. preparation of plan and supervision of execution of work.

(1) Every person who intends to erect, re-erect or add to or alter any building shall get its plan prepared and structural work designed and supervised by an architect, structural engineer/licensed building Planner as required under Rule 17. While submitting the plan the architect/licensed building Planner/structural engineer should certify to the effect that the site has been personally inspected while planning the building and/or designing the structural members, as well as has taken into account the findings or recommendations of stability analysis as well as examined the Soil Tests Reports as and where necessary under this rule.

(2) In all such cases, the licensed building Planner, structural engineer or geological engineer shall have to be empanelled with the Nagar Panchayat or Municipality.

(3) The name and address and license or empanelment number of person so employed and serial number / registration number in the case of architect shall be stated in the application in respect of such buildings.

(4) In case of building plans/site plans submitted by central or state government or by organization controlled by Central or State Government, if the plans are prepared and submitted under the signature of Government Engineer or Architect who are employees of the applicant organization, the Rule 16 (1) and 16 (3) shall not be applicable.
17. Engagement of technical personnel.

(1) Every person who intends to erect, re-erect, add to or alter any building shall subject to the provisions of the Act and these rules, engage,

(a) for all buildings upto 4.5 M. in height, a technical personnel of at least a diploma holder Licensed Building Planner for planning, designing and construction of the building structure and the foundation;

(b) for all buildings above 4.5 meters and up to 8.0 m. in height and/or for erection involving deep foundation works or construction of basement or any other underground structure thereto, a licensed Degree holder Building Planner and/or an Architect and a Structural Engineer for planning, designing and construction of the buildings including foundation;

(c) for all other buildings above 8.00 meter and upto 14.0 m. in height and/or for erection involving piling works, deep foundation works or construction of basement or any other underground structure thereto or separately, a licensed degree holder Building Planner, an Architect, a Structural Engineer and a Geo-technical Engineer for planning, designing and construction of a building; and

(d) for all other buildings above 14.0 meters in height, permission has to be sought from the state government through the Municipality/Nagar Panchayat. Engagement of technical personnel shall be as per (c) above;

provided that licensed Building Planners, the Architect, the Structural Engineer and the Geo-technical Engineer will work in association with one another and they will be individually and/or collectively responsible for ensuring the safety of the building structure and its foundation;

(2) In case of death, resignation removal of Architect Structural Engineer, Geo-technical Engineer or Licensed Building Planner as the case may be a fresh engagement shall be made forthwith and shall be notified to the Chairman of the Municipality /Nagar Panchayat. No work shall be carried out in the intervening period, if any.
(3) The validity of any engagement made under these rules shall lapse, in the case of an Architect with lapse of validity of registration granted under the Architect's Act, 1972 (20 of 1972), or in the case of a Structural Engineer and a Geo-technical Engineer with the lapse of empanelment, or in the case of Licensed Building Planner, with lapse the validity of license.

(4) A Structural Engineer or a Geo-technical Engineer is also required to be empanelled with the Naigar Panchayat / Municipality.

(5) A Licensed Building Planner shall have -

(a) at least a diploma in Civil Engineering or Architecture from a recognized university or an equivalent engineering qualification recognized by the Government and shall not have less than 2 years experience in planning, designing and execution of building work including sanitary and plumbing works related to buildings, or

(b) a degree in Civil Engineering or Architecture from a recognized university or an equivalent Engineering qualification recognized by the Government and shall not have less than 2 years' experience in planning, designing and execution of building works including sanitary and plumbing works related to buildings.

18. Time and manner of disposal of application under rule 13, -

Within 15(fifteen) working days from the date of receipt of an application with building plan, the Local Bodies / Municipality may require the applicant -

a) to furnish him with any information on matters referred to in these rules which has not already been given in the documents there under;

b) to satisfy, him that there are no objections which may lawfully be taken to the approval of the building plans;

c) if any requisition made under these rules is not complied with within 1(one) month, the application for approval of the building plans shall be
19. **Action to be taken while a building is under construction.**

1(one) copy of the sanctioned building plan and copy of the documents mentioned in Part II A 14 (6) shall be kept at the site of the building at all times when building operations are in progress and such plans shall be made available at all such times for the inspection of the Municipality/Nagar Panchayat or of any officer authorized by it in that behalf.

20. **Sanction of building Plan and permission to execute work.**

1) within 60(sixty) days of the receipt of any application with building plan or of any information or documents which the Nagar Panchayat/Municipality may reasonably require the applicant to furnish before deciding whether permission shall be granted to execute any work, the competent authority shall, by written order -

a) accord sanction, in Form 'C', to the building plan conditionally or unconditionally give permission to execute the work, or

b) refuse in Form 'D' on one or more of the grounds mentioned in section 126 of the Act to accord such sanction, or

c) accord sanction but impose conditions for permission to execute the work, or

d) accord provisional sanction under the proviso in section 125 of the Act.

Provided further that in the case of a provisional sanction, the applicant shall furnish a statement to the effect that, if he is unable to produce the license or permission as required, the provisional sanction would be at his own risk and cost and shall not be made final and the occupancy certificate under Rule 34 of this Rules shall not be issued in respect of the use other than that specified in the Building Plan.

2) The Building permit shall not be issued till a duly authenticated copy of a receipt showing payment to the Municipality / Nagar Panchayat of the Building Permit Fees payable under rule 25 of these rules for the sanction of the buildings, is produced before the Chairman of the Local Body.
21. **Power to cancel permission on the ground of material misrepresentation by applicant**.-

If, at any time permission to erect any masonry or framed building has been given and the Local Body of Nagar Panchayat / Municipality is satisfied that such sanction, was granted in consequence of any material misrepresentation or fraudulent statement contained in the application or in the plans, elevations, sections or specifications submitted therewith in respect of such building the Local Body of the Nagar panchayat/ Municipality may cancel such permission, and any work done thereunder shall be deemed to have been done without sanction.

22. **Appeal on refusal of sanction of building plan**.-

Where permission has been refused, the applicant may make further appeal to the Local Body for re-consideration.

23. **Sanction of plan in case of delays.** -

If within the period specified in these rules, the Local Body has neither sanctioned nor refused to accord sanction to execute any work, the applicant may appeal to the Chairman in writing, in this regard and if the appeal is not disposed of within 30(thirty) days from the date of receipt of the appeal, such sanction or permission shall be deemed to have been granted and the applicant may proceed to execute the work. So, however that nothing in the sanction shall be deemed to have permitted the applicant to contravene any of the provisions of this rule or any other rules or regulations applicable to such works.

24. **Duration and expiry of sanction of building plan.** -

(1) A sanction to erect a building accorded under these rules shall be valid for 3(three) years from the date on which it is sanctioned and may be renewed thereafter for a further period of 2(two) years on payment, in the form of cash or bank draft, of such fees as may be determined by the Local Body on the basis of rule 25, and on production of the previously sanctioned plan. A building plan may be revalidated for a
further period of 5 years only in case a building has been partly completed and occupancy certificate in terms of rule 34 has been issued as well as on production of the previous sanctioned/revalidated building plan, the completion certificate and on receipt of fees required to be paid as to be determined by the Nagar Panchayat / Municipality from time to time;

provided that, if the application for renewal of a building is made after the expiry of 3(three) years, the same shall be accompanied by a renewal fee with a fine not being less than Rupees 2(two) thousand or as may be determined by the Municipality/Nagar Panchayat concerned.

(2) Any person who erects a building or continues the work of erection of a building after the permission sanctioned under these rules has expired, shall be deemed to erect such building or to continue such work without sanction;

(3) The erection of a building or work shall be completed within the period specified by the Local Body under section 211 of the Act.

25. **Fees for sanction of building plans.**

(1) The Local Body shall levy a minimum fee for sanction of building plan at such rates, specified in the following on the basis of the sanctioned total covered area in all floors - however maximum fees will not exceed one 5 (five) times the minimum specified fees as given hereunder -

   (a) for load bearing buildings the minimum rate of fees would be Rs. 20/- (twenty) per sq. mt. and

   (b) for buildings proposed to be constructed by RCC structure, the rate of fees would be Rs. 25/- (Twenty five) per sq. mt.

(2) In the case of steel towers, the Municipal Council / Local Body shall levy fees at the rate of Rs. 3/- (three) per cubic metre of the volume of such towers.

(3) The Municipal Council /Local Body shall levy a development fee, in addition to the fees specified in sub-rule(1) or sub-rule(2), as the case may be, for passing the building whose Floor Area Ratio has been calculated on the basis of a means of access which is a National Highway, State Highway or any such access having an width of 15 metres or above, at such rates as may be determined by the
26. **Signature of approved plan.**

When the Chairman of Local Body has given permission to execute any work, the approved plans of the work shall be signed by such officer as may be authorized in its behalf and 1(one) set of approved plan and 1(one) set of certified copy of the approved plan shall be handed over to the applicant.

27. **Retention of plan and submission of fresh applications.**

When sanction to erect a new building (other than a hut) is refused,

(a) the Chairman of the Local Body will retain two copies of plan and shall without charge, furnish applicant with its reason for such refusal in writing; and

(b) the applicant may, at any time thereafter, send to Chairman of the Local Body a fresh application and fresh or modified documents under these rules with the object of meeting the objections for which such sanction was refused.

---

**C. COMMENCEMENT OF WORK**

28. **Notice to the chairman of the Local Body before Commencement of work.**

Not less than 7(seven) days before any person commences to erect or re-erect a building shall send to the Chairman a notice, in Form ‘E’, specifying the date on which he proposes to commence the work.
29. **Notice for completion of work up to plinth level.**

(1) After the completion of the structural work up to the plinth level or up to 1(one) metre above ground level, whichever is higher, the applicant shall give a notice to the Local Body in Form 'F' to enable him to inspect such work.

(2) An officer of the Municipality / Nagar Panchayat duly authorized in this behalf shall inspect the work at the site within 15(fifteen) days from the date of the receipt of the notice and within 7(seven) days of such inspection issue necessary direction, if any.

30. **Deviations during construction.**

(1) No deviation from the sanctioned plan shall be made during erection or execution of any work.

(2) Notwithstanding anything contained in sub-rule (1),

(a) if during erection or execution of work any internal alteration within the sanctioned covered space which does not violate the provisions of the Act or these rules, is intended to be made, the person referred to in sub-rule(1) of rule 13 shall inform the Local Body by notice in writing along with a certificate from the Architect or the Licensed Building Planner, as the case may be, together with drawings incorporating the deviations and structural calculation in case of structural deviations, stating the nature and purpose of Plan under rule 33; of such deviations at least 15(fifteen) days prior to carrying out such erection or execution of work and may proceed with the execution of such work subject to the condition that such deviations shall be incorporated in the 'Completion plan' under rule 33;

(b) if during the erection or execution of work any external deviation beyond sanctioned covered space is intended to be made and which does not violate the provisions of the Act or these rules, the person referred to sub-rule (1) of rule 13 shall, prior to carrying out such erection or execution of works, submit , in accordance, with the provisions of those rules, a revised plan incorporating the deviations intended to be
carried out, for obtaining necessary sanction thereof.

(3) If no notice is served under clause (a) of sub-rule (2) above, or the work of erection or execution is undertaken without the sanction referred to in clause (b) above, such erection or execution of work shall be deemed to be in contravention of the provisions of the Act and these rules and shall be dealt with accordingly.

31. Demolition of unauthorized construction.

(1) The Local Body may order for demolition or alteration of any building/buildings, if the competent authority is satisfied -

(a) that the erection of any building -

(i) has been commenced without obtaining the sanction or permission of the competent authority, or

(ii) is being carried on or has been completed otherwise than in accordance with the particulars on which such sanction or permission or order is based or after such sanction or permission has been lawfully withdrawn, or

(iii) is being carried on or has been completed in breach of any provision of the Act or these rules or of any condition, modification, direction or requisition lawfully given or made under the Act or under these rules.

(2) If any material alteration of or addition to, any building has been commenced or is being carried on or has been completed in breach of any provision of the Act or these rules or if any alterations required by any notice issued under these rules have not been duly made, the Local Body may, in addition to any prosecution that may be instituted under the Act, they make an order directing that such erection alteration or addition, as the case may be, or so much thereof as has been executed unlawfully or if any structure specified in the application or plan or specification as a structure to be demolished or altered before the erection of the new building has not been demolished or altered or if any material alterations or additions have been made, such alterations or additions shall -

(a) be demolished by the owner thereof or altered by him to the satisfaction of
the competent authority, as the case may require; or

(b) be demolished or altered by the competent authority at the expense of the said owner;

provided that prior to carrying out any demolition of any building or part thereof as described in the notice, the owner of the building shall be given a notice stipulating therein the date and time to appear himself or through his authorized representative before the Local Body who will hear the circumstances under which such deviation/unauthorized construction work has been carried out and after hearing record the order of the Local Body and the said order shall be communicated to the owner officially.

(c) all demolished materials shall be removed by the Nagar Panchayat / Municipality at the cost of the owner or to the satisfaction of the Nagar Panchayat /Municipality within a maximum period of 30(thirty) days from the date of demolition.

32. **Stoppage of erection of new building in certain cases.**

1. In any case the construction of a new building(s) is sought to be erected on a soil which is recently filled up (known from the records of Settlement or Municipality/Nagar Panchayat about topography of the soil) pond, lake, marshy and sub-soil, the Chairman of the concerned Local Body may seek a Soil Test Report issued by a competent authority along with the proposed building plan. Considering the Soil Report, the Chairman may restrict the maximum height of the building or he/she may advice to change the structural design or reject the construction of the said building.

2. In any case in which the erection of a new building or any other work has been commenced or is being carried on unlawfully, the Chairman may, by written notice, require the person carrying on such erection or other unlawful work to discontinue the same.

3. If any notice issued under these rules is not duly complied with, the competent authority may, with the assistance of the police, if necessary, take such steps as it may deem needful in order to stop the continuance of the
unlawful work.

(4) If it appears to the competent authority that it is necessary, in order to prevent the continuation of the unlawful work, to depute any public or municipal officer to watch the premises, the cost of providing the same shall be borne by the person to whom the notice was addressed.

33. **Completion of work.**

After the completion of the erection of a building or the execution of any work, the owner of the building shall submit a notice of completion in Form 'G'. In case of deviation as stated in clause (a) of sub-rule (2) of rule 30, the notice shall be accompanied by 3(three) sets of building plan and marked 'completion plan' with all revisions and modifications including those referred to in sub-rule (2) of rule 30. The applicant shall duly sign the plans and also the concerned technical personnel specified in rule 17;

provided that for a residential or educational building in any municipal area, not exceeding 8.0 metre in height on a plot of 200 Sq. metre in area, application of this rule may not be insisted upon but the owner will have to intimate in writing to the Municipality/Nagar Panchayat about the completion of such building.

34. **Occupancy certificate.**

(1) Within 15(fifteen) days of receipt of the notice of completion of building or work, the Local Body or the authorized representative in this behalf, shall inspect the building or work and shall satisfy itself or himself that the erection of the building or the execution of the work has been done in accordance with the sanctioned plan.

(2) Within 15(fifteen) days from inspection, the Local Body shall, if it is satisfied that the building or the work has been completed in accordance with the sanctioned plan, issue an occupancy certificate, in Form "H";

provided that such certificate shall not be issued in the case of a building or any work for which provisional sanction was given unless the applicant produces before the Chairman the license or permission;
provided further that the occupancy certificate shall be issued only after all the extra materials like sand, boulders, stone chips, cement, steel, bamboo, timber, etc. lying on the public road have been removed by owner and the damages to public property, if any, has been made good by the owner with his own cost to the entire satisfaction of the Local Body.

(3) After due verification, one set of the building plan shall be returned to the applicant with the endorsement of approved completion plan under the signature of the Chairman or an Officer authorized in this behalf.

(4) The Local Body may, upon a written request from an applicant and on his furnishing an Indemnity Bond undertaking to indemnify the Local Body against any risk, danger or damage to any person, whether an occupier or not, and on his giving an undertaking to ensure in such manner as the Local Body may specify, public safety, issue a partial occupancy certificate, subject to the provisions to sub-rule (1) and the proviso to sub-rule (2); provided that no partial occupancy certificate shall be issued unless the Local Body is satisfied that the portion for which such partial occupancy is solicited is in a habitable condition;

provided further that when the erection of the building or the execution of the work is completed within the period or the extended period provided for in the Act, the applicant shall apply for conversion of the partial occupancy certificate or issue of an occupancy certificate, and such certificate may be issued in accordance with the provisions of these rules.

(5) In case where the occupancy certificate is refused, the Local Body shall communicate the reasons thereof in writing to the applicant within 30(thirty) days from the date of receipt of the notice of completion of the work.

(6) In case where, in the opinion of the Local Body the building or the work has not been completed in accordance with the sanctioned plan, it may take necessary action in accordance with the provisions of the Act and these rules.

(7) The Local Body shall not permit connections to be made to municipal water mains and municipal drains, if any, from any new building in respect of which occupancy certificate has not been issued.
provided that the Local Body may order severance of such connections if he is of the opinion that the conditions of the partial occupancy certificate are being violated or if further erection of the building or execution of the work is proceeding contrary to the sanctioned plan.

(8) The Local Body shall not permit construction to be made to municipal water mains, if any, from any new building in respect of which water connection fee, as may be specified by the Local Body from time to time, has not been paid in advance.

35. **Delay in issue of occupancy certificate.**

(1) In case where, within a period of 30(thirty) days from the receipt of the notice of completion, the Local Body fails to issue an occupancy certificate or to communicate refusal the applicant may make a representation in writing to the Chairman.

(2) The Chairman shall, after such enquiry as he may think fit, and after giving the applicant an opportunity of being heard, issue the occupancy certificate or communicate refusal of the same to the applicant within a period of 30(thirty) days from the date of receipt by the Chairman of the representation.

36. **Prohibition of use of Building without occupancy certificate.**

No person shall occupy or permit to be occupied a building erected or re-erected or altered under the Act in respect of which an occupancy certificate or a partial occupancy certificate under these rules has not been issued by the Local Body.

37. **Work subsequent to issue of occupancy certificate.**

If any re-erection or addition or alteration of a building in respect of which an occupancy certificate has been issued is intended, a fresh notice under the Act or these rules, as the case may be, shall be necessary.

38. **Notice for covering up drains, etc.**
39. **Power of Chairman of the Local Body, to guard against accidents during construction or repairs.**

   (1) The Chairman of the Local Body, so far as practicable during the construction or repair of any building, street, drain, water-supply line or other premises vested in the Municipality/Nagar Panchayat or in an owner, cause proper precaution for guarding against accident to be taken by shorting up and protecting the adjoining buildings, and shall cause such bar, char or post as it shall think fit, to be fixed across or in any street to prevent the passage of any carriage, cart or other vehicle, or of cattle, and avert danger while such construction or repair is being carried on, and shall cause such construction or repair work in a street to be sufficiently lighted and guarded during the night.

   (2) Whoever takes down, alters or removes any such bar, chain or post or removes or extinguishes any such light without the authority or consent of the Chairman of the Local Body shall be published with fine which may extend to Rs. 250/- (two hundred and fifty) only.

40. **Power of Chairman of the Local Body to cause hoards or fences to be set up during construction, repair, etc.**

   A person intending to construct or take down any building or any other structure or to alter or repair any other structure externally shall, if the position or circumstances of the work is or are likely to cause, or may cause obstruction, danger or inconvenience in any street, before beginning such work -
(a) obtain beforehand permission in writing from the Chairman of the Local Body so to do; and
(b) cause sufficient hoards or fences to be put up in order to separate the area where the work is to be carried on, from the street, and shall maintain such hoards or fences standing and in good condition to the satisfaction of the Chairman of the Local Body during such time as the Chairman of the Local Body considers necessary for the public safety or convenience and shall cause the same to be sufficiently lighted during the night and shall remove the same when directed by the Chairman of the Local Body.

41. **Power as to inflammable structures.**—

(1) (a) The Local Body may, by public notice, direct that within certain limits to be fixed by the competent authority, the roofs and external walls of huts or other buildings shall not be made or renewed with grass, mats, leaves or other highly inflammable materials without the consent of the Chairman in writing.

(b) The competent authority may, at any time, by written notice, require the owner of any building(s), which has an external roof or wall made of such material as aforesaid, to remove such roof or wall within such reasonable time as shall be specified in the notice, notwithstanding that the public notice has not been issued or that such roof or wall was made with the consent of the competent authority or before the issue of such notice, if any, provided that in case of any such roof or wall in existence before the issue of such notice or made with the consent of the competent authority, the competent authority shall pay compensation for any damage caused by the removal, which shall not exceed the original costs of construction of the roof or wall.

(2) The floors of the lobbies, corridors, passages and landings of a building other than residential or educational shall be, constructed of incombustible materials; the doors shall be constructed of fire-resisting materials and the flights of stairs shall be constructed either of incombustible materials or fire-resisting material.

(3) The following material shall, for the purpose of this rule, be deemed to be
incombustible: -

(a) brick-work constructed of bricks, well-burnt, hard and sound, properly bounded and solidly put together with -

(i) mortar compounded of lime and sharp clean sand, hard clean broken brick, broken flint, gills or slag, well pulverized, or

(ii) cement mixed with any of the materials mentioned in sub-clause (i);

(b) granite or other stone which is suitable for building purposes by reasons of its solidity and durability;

(c) slate, tiles, bricks and terracotta, when used for covering or corbels;

(d) flag-stones when used for floors over arches, if not exposed on the underside and if not supported at the ends only;

(e) concrete, composed of broken brick, stone chippings of selected slag and lime, cement or calcined gypsum, when the concrete is used for filling is used for filling in between joints of floors to a depth of not less than ten centimeters;

(f) any combination of concrete, steel or iron or any other materials approved in this behalf from time to time by the Local Body.

Explanation:- In this rule, the expression, brick, lime or cement shall mean respectively such brick, lime or cement as conform to the standard and quality specified in this behalf in the latest edition of the National Building Code.

(4) The following materials shall, for the purpose of sub-rule (2), be deemed to be fire-resisting, but not incombustible:

(a) sal, teak, and other hard timber, when used for beams or posts or in combination with steel, the timber and the steel (if any) being protected by plastering in cement or other incombustible or non-conducting external coating;

(b) in the case of staircase, sal, teak or other hard timber, not less than four centimetres thick; and

(c) in the case of staircase, sal, teak or other hard timber, the
treads and risers being not less than four centimetres thick.

42. **The structural design.**

(1) The structural design of foundation, masonry, timber, plain concrete, reinforced concrete, prestressed concrete and structural shell shall be in accordance with the provisions of the latest edition as laid down in rule 61 (1), (2), and (3) of Tripura Building Rules as indicated in the National Building Code of India and relevant codes of practice of the Bureau of Indian Standards (as listed in Annexure-11) meant for plain and/or hill areas:

The structural design for all parts of the building shall also take into consideration the seismic factors, wind forces, land slides in accordance with the relevant BIS codes of practice/Guidelines (as listed in Annexure - 11);

(2) Unless otherwise specifically provided for in the Act or these rules all materials and workmanship shall be of good quality, conforming generally to the accepted standard of the Public Works Department of the Government of Tripura or Indian standard specifications as included in the Part V on Building Materials and Part VI on Constructional Practice and safety of the latest edition of the National Building Code of India.

43. **Distance from electric lines.**

No building, or veranda, or balcony or projection in any building shall be permitted to be erected, re-erected, added to or altered in any case where the distance between such construction and any overhead electric lines, in accordance with the provision of the Indian Electricity Act, 1910(9 of 1910), and the rules made there under, is less than that specified hereinafter: ("m" indicates metre)

#### 44. Notification by State Government for Fire Protection

The State Government may from time to time prescribe in the interest of public safety, by notification, such other conditions as may be necessary for the fire protection, fire prevention and fire fighting in relation to any case of buildings and the Local Body shall comply with such conditions.

#### 45. Rat-proofing

(1) Every building or part thereof, designed or intended for use for dwelling, storage or safe of goods, shall conform to the requirements specified in sub-rule (2) and (3).

(2) Every such building, unless supported on posts, shall have continuous foundation walls, extending from at least 60 (sixty) centimeters below ground level, or shall have continuous floor of masonry or reinforced or other equal rat-proof material or materials as approved by the Local Body.

(3) All openings in such foundations or floors, windows and drains and all junctions between foundation walls and building walls shall be effectively rat-proofed, that is, windows and doors shall be tight-fitting, other openings shall be securely covered with rat-proof screening or shall be tightly closed with metal sheeting, concrete or other equal rat-proof materials as may be approved by the Competent Authority of the Local Body.
PART-III

Means Of access, Ground Coverage, Permissible Height.

46. Rules for means of access. -

(1) (a) Every plot shall abut a means of access which may be a public street or private street or passage.
(b) The relationship between the width of the means of access and the maximum permissible height of building shall be as indicated in these rules.

(2) The minimum width of means of access in respect of a new building shall be as follows: -

(a) No new building shall be allowed on a plot unless the plot abuts a street which is not less than 10.00 meters in width at any part, or there is access to the plot from any such street by a passage which is not less than 10.00 metres in width at any part:

provided that -

(i) In the case of a residential building, with other occupancies if any on less than 10% of the total covered area of building, the width of such street or passage shall not be less than 2.40 metres at any part;

(ii) In the case of a residential building with educational occupancy on 10% or more of the total covered area of the building, the width of such street or passage shall not be less than 7.00 metres at any part.

(iii) In the case of an educational building with residential occupancy the width of such street or passage shall not be less than 7.00 at any part.

(iv) in case of an educational building with other occupancy or occupancies not being residential on less than 10% of the total covered area of the building the width of such street or passage shall not less than 7.00 metres at any part;
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

(b) Notwithstanding anything contained in clause (a) above residential building up to a maximum height of 4.5 metres may be allowed on a plot abutting a means of access not less than 1.5 metres (without drains) in Nagar Panchayats and 1.8 metres (without drains) in Agartala Municipal Area, provided such means of access is in long existence and is recorded in the settlement records and/or Nagar Panchayat / Municipalities records accordingly.

(3) Any building which is fully or partly put to assembly occupancy for the purpose of theatre, motion picture house, city hall, skating ring, auditorium, exhibition hall or for similar other purposes shall not be allowed on a plot located within 50 metres of junction of two streets, the width of each of which is 15.00 metres or more.

47. **Ground coverage in respect of buildings.**

(1) (a) The maximum permissible ground coverage for building, when a plot contains a single building, shall depend on the plot size and the use of the building as given in the table below:

<table>
<thead>
<tr>
<th>Type of building</th>
<th>Maximum permissible ground coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Residential and Educational:</td>
<td></td>
</tr>
<tr>
<td>(a) Plot size up to 200 sq. metres</td>
<td>65%</td>
</tr>
<tr>
<td>(b) Plot size above 500 sq. metres</td>
<td>50% or 130 sq. metres whichever is more</td>
</tr>
<tr>
<td>2. Buildings of other use including mixed use</td>
<td></td>
</tr>
<tr>
<td>(a) Plot size of less than 200 sq. metres</td>
<td>40%</td>
</tr>
<tr>
<td>(b) Plot size of 500 Sq. metres or more</td>
<td>50%</td>
</tr>
</tbody>
</table>

(b) For any other size of the plot, in between the plot size of 200 to 500 square metres, the percentage of coverage shall be calculated by direct interpolation.
(2) When a plot contains more than one building the maximum permissible ground coverage for the building shall be as stipulated in rule 52.

48. **Permissible height of buildings**

(1) Height of a building shall be the vertical distance measured from the average level of the centerline of the adjoining street or passage on which the plot abuts, to the highest point of the building, whether with flat roof or sloped roof.

(2) (a) The following appurtenant structures shall not be included in the height of the building:

(i) stair cover not exceeding 2.40 metres in height;
(ii) lift machine room as per the latest edition of the National Building Code;
(iii) roof tanks with their supports, the height shall not exceeding 1.80 metre;
(iv) chimneys;
(v) parapet walls not exceeding 1.50 metres in height;
(vi) ventilating, air conditioning and other services equipments;
(vii) height above mid-point between caves level and ridge level.

(b) The aggregate area of the structures mentioned in clause (a) shall not exceed one-third of the area of the roof upon which these are erected.

(3) The maximum permissible height of buildings on a plot shall be as given in the table below:

<table>
<thead>
<tr>
<th>Width of means of access (in metres)</th>
<th>Maximum permissible height (in metres)</th>
</tr>
</thead>
<tbody>
<tr>

<td>Tall buildings (above 14.0 mts.)</td>
</tr>
</tbody>
</table>

Explanation: - This table shall be read with rule 46. For height of buildings exceeding 14.0 meters rule 51 shall be referred. But buildings above 14.0 mts. in height permission shall be obtained from the state government.

(4) For any building to be erected, or re-erected or added to in the vicinity of aerodrome, or which may affect the functioning of any microwave system or telecommunication purposes, the height of such building shall be governed by such rules or directions as my be made or issued in this behalf by Central Government or any other concerned authority.

(5) The Local Body may, if necessary, restrict the height of buildings in any area within the Nagar panchayat/ Municipal Area, below that provided under sub-rule(3) for reasons to be recorded in writing.
49. **Open space for building**—

(1) **Generally**—

(a) Every room intended for human habitation shall abut an interior or exterior open space or an open verandah, open to such interior/ exterior open space. Open spaces shall be areas forming integral parts of the plot at ground level and shall be open to the sky without any projection or overhang excepting cornices, chajja or weather shades of not more than 0.50 metre width;

(b) Every building shall have exterior open spaces comprising front open space, rear open space and side open spaces. The minimum width prescribed for front open space, rear open space and side spaces shall be provided along the entire front, rear and side faces of the building respectively. For this purpose the front of the building shall be that face of the building which faces the means of access of the building and the rear part of a building shall be deemed to be that face of the building which is farthest from the means of access. These provisions shall also be applicable to each individual building separately when a plot contains more than one building. In the case of a corner plot located at the crossing of more than one street or passage, the rear of the building shall be deemed to be that face of the building which is farthest from the widest of all such streets and or passages;

(c) Open spaces prescribing to one site cannot be taken for another site. No building shall at any time be erected on any open space prescribed in these rules for a building and form part of the site thereof, nor shall such open space be taken into account in determining the area of any open space required under these rules for any other buildings;

(d) If the front open space is 3.00 metres or more in width a gate Goomti for security purpose may be allowed in the said open space. The covered area of such Goomti shall not in any case exceed 3.00 sq. metres and shall
(2) The minimum front open spaces shall be as follows:

(a) every residential or educational building shall have a minimum front open space at ground level of 1.20 metres at its narrowest part;

(b) in the case of residential or educational building with other occupancy or occupancies covering more than 20% of the ground floor of the building, the minimum front open space at the ground level shall be 2.00 metres at its narrowest part;

provided that for such building on plots with area of 300.00 sq. metres or less, the minimum width of the front open space shall be 1.20 metres if the part of the building used for other occupancy or occupancies is not more than 30.0 sq. meters at the ground floor;

(c) every industrial or storage or mercantile (wholesale) building shall have a minimum front open space at ground level of 5.00 metres at its narrowest part in the plains and 3.00 metres at its narrowest part in the hills;

(d) in the case of industrial or storage or mercantile (retail) building on plot area of less than 300.00 sq. metres the minimum front open space shall be 1.20 metres at its narrowest part;

(e) every institutional or business building shall have a minimum front open space at ground level of 3.00 metres at its narrowest part;

(f) every assembly building shall have a minimum front open space at ground level of 4.00 metres at its narrowest part;

(g) every club (assembly) building on plot area less than 200 sq. metres, the minimum front open space shall be 2.00 metres;

(h) for mixed use buildings, the minimum front open space shall be the one applicable for that particular occupancy which gives the highest provision of the minimum front open space in this rules.
(3) The minimum rear open space shall be as follows:-

(a) every building shall have a minimum rear open space at ground level of a width at its narrowest part of not less than that indicated below:-

<table>
<thead>
<tr>
<th>Height of building (metres)</th>
<th>Minimum rear open space at its narrowest part (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 8.00</td>
<td>2.00</td>
</tr>
<tr>
<td>Above 8.00 but not more than 11.00</td>
<td>3.00</td>
</tr>
<tr>
<td>Above 11.00 but not more than 14.00</td>
<td>4.00</td>
</tr>
</tbody>
</table>

(b) notwithstanding anything contained in clause(a) above, the minimum width of rear open space at its narrowest part for industrial or storage or mercantile (wholesale) building shall be 3.50 metres.

(4) The minimum side open space shall be as follows:-

(a) every building shall have minimum side open spaces at ground level of width at its narrowest part of not less than that indicated hereinafter -

<table>
<thead>
<tr>
<th>Height of building (metres)</th>
<th>Minimum side open space at ground level at its narrowest part (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Side 1</td>
</tr>
<tr>
<td>Up to 11.00</td>
<td>1.20</td>
</tr>
<tr>
<td>Above 11.00 but not more than 14.00</td>
<td>1.50</td>
</tr>
</tbody>
</table>

For plots of size not more than 65 (sixty-five) sq. metres minimum side open space of 0.9 metres may be allowed on each side provided that the building height does not exceed 8.00 (eight) metres.

(b) notwithstanding anything contained in clause(a) above, the minimum distance across the side open space from every new building to an existing building with a door or window opening shall be 1.80 metres.

(c) notwithstanding anything contained in clause(a) above, the minimum width of side open spaces for an industrial or storage or
mercantile (wholesale) building shall be 3.50 metres;

(d) in the case of a building more than 24.00 metres in depth on a plot abutting any street a passage along the entire depth of the building shall be provided and the minimum width of such passage shall be 4.0 metres.

(5) The interior open space shall be as follows:

(a) for inner courtyard,

in case the whole of one side or part of at least two sides of every room excepting bath, water-closets and store-room is not abutting either the front, rear or side open spaces, it shall abut an inner courtyard whose minimum width shall be 30% of the height of the building or 3.00 metres whichever is more.

(b) for ventilation shaft, that is to say, for ventilating water-closet and bath-room such water-closet or bath-room if not opening to front side, rear or interior open space, shall open on to a ventilation shaft, the size of which shall not be less than the values given below:

<table>
<thead>
<tr>
<th>Height of building (metres)</th>
<th>Minimum area of ventilation shaft (Sq. metres)</th>
<th>Minimum width of shaft (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 11.00</td>
<td>1.50</td>
<td>1.00</td>
</tr>
<tr>
<td>Above 11.00 but not more than 14.00</td>
<td>3.00</td>
<td>1.20</td>
</tr>
</tbody>
</table>

Note: No chajja shall be allowed in the ventilation shaft unless the width of shaft is 2.40 metres or more.

(c) if there be building, other than boundary wall on not more than three sides of a building the minimum width of such courtyard, shall not be less than 20% of the height of the building or 2.50 metres whichever is more.

50. **Provision of parking space for a building within a plot.**

(1) Generally:

(a) the minimum size of a car parking space shall be 2.40 metres x
4.50 metres and that for a truck or bus parking space shall be 3.75
metres x 10.00 metres. These spaces do not include the area of
circulation internal roads, aisles and driveways. The minimum width of
an internal circulation road shall be 3.50 metres for cars and 5.00 metres
for trucks;

(b) in calculating the number of parking spaces as per the norms laid
down sub-rule (2), (3), (4), (5), (6), (7) or (8) hereinafter the covered
area shall be the same as the total covered area of the building but shall
exclude the area of covered parking spaces, if any;

(c) the parking lay-out plan shall be so prepared that the parking space
for each vehicle becomes directly accessible from the drive-way or
circulation drive-way or aisles. This clause shall not be applicable to
residential building up to 14.0 metres in height;

(d) the open spaces within the plot may be allowed to be utilized for car
parking spaces open to the sky provided that the minimum front, rear
and side open spaces prescribed in rule 49 shall be kept free from
parking;

(e) for areas with different occupations in a building the number of
parking spaces shall be worked out on the basis of each of the
occupancies separately and total number of parking spaces required for
the building;

(f) in case of a plot containing more than one building; parking
requirement shall be calculated for each building separately, on the
basis of use of each building;

(g) in calculating the areas different tenements or different occupancies
in the same building or different units of the same occupancy in a
building, the areas of common spaces of any floor, which are included in
the calculation of the total covered area shall be distributed proportionately amongst the different units or tenements;

(h) for plots in a scheme for Economically Weaker Section and Low
Income Group Housing under Government approved schemes, the
parking requirement shall be as indicated in Rule 54 / Special Chapter – 
XIII.

(i) for plots with means of access of less than 3.50 metres in width, 
car parking space may not be provided;

(2) for residential occupancy, car parking shall be subject to the following 
provisions (parking space includes spaces for parking of cars, two-wheelers, 
three wheelers, bi-cycles etc.).

(a) Building with single tenement -

(i) no car parking space shall be necessary for total covered 
area of less than 100.00 sq. metres;

(ii) one car parking space shall be necessary for a total covered 
area of 100.00 sq. metre but less than 200.00 sq. metres;

(iii) one car parking space for every 200.00 sq. metres of covered 
area shall be necessary for a total covered area of 200.00 sq. metres 
or more.

(b) Building with more than one tenement: -

(i) Tenements each up to 50.00 sq. metres of covered area;

(A) no car parking space shall be necessary up to 5(five) such 
tenements;

(B) one car parking space shall be necessary for 6(six) such 
tenements;

(C) one additional car packing space shall be necessary for every 
additional 6(six) such tenements.

(ii) Tenement each with more than 50.00 sq. metres but up to 75.00 sq. 
metres of covered area:

(A) no car parking space shall be necessary up to 3(three) such 
tenements;

(B) one car parking space shall be necessary for 4(four) such 
tenements;

(C) one additional car parking space shall be necessary for 
every additional 4(four) such tenements.

(iii) Tenement each with more than 75.00 sq. metres but up to
100.00 sq. metres of covered area; 1(one) car parking space shall be necessary for every 2(two) such tenements.

(iv) Tenement each with more than 100.00 sq. metres of covered area:

1(one) car parking space shall be necessary for each tenement having covered area less than 200.00 sq. metres. 1(one) additional car parking space shall be necessary for every additional 100.00 sq. metres of covered area of the tenement.

(v) For a building with tenements of additional sizes, the car parking requirement shall be calculated on the basis of the requirement of each size group subject to the condition that at least 1(one) car parking space shall be necessary for more than 300.00 sq. metres of total covered area of building, irrespective of the number of sizes of tenement.

For business occupancy, car parking shall be subject to the following provisions (parking space includes spaces for parking of cars, two-wheelers, three-wheelers, bi-cycles etc.) :-

(a) for covered area up to 1500.00 sq. metres:

1(one) car parking space for every 75.00 sq. metres of covered area, or part thereof shall be necessary;

(b) for covered area above 1500.00 sq. metres but up to 5000.00 sq. metres:

20(twenty) car parking spaces plus 1(one) additional car parking space for every 100.00 sq. metres of covered area or part thereof beyond 1500.00 sq. metres shall be necessary;

(c) for covered area above 5000.00 sq. metres:

55(fifty-five) car parking spaces plus 1(one) car parking space for every 200.00 sq. metres of covered area or part thereof beyond the 5000.00 sq. metres shall be necessary.

(4) For mercantile (retail) occupancy, car parking shall be subject to the following
provisions (parking space includes spaces for parking of cars, two-wheelers, three-wheelers, bi-cycles etc.) :-

(a) no car parking space shall be necessary up to a total covered area of 50.00 sq. metres;

(b) for covered area above 50.00 sq. metres:

1(one) car parking space plus 1(one) additional car parking space for every additional 100.00 sq. metres of covered area shall be necessary.

For assembly occupancy, car parking shall be subject to the following provisions (parking space includes spaces for parking of cars, two-wheelers, three-wheelers, bi-cycles etc.) ;

(a) restaurant, eating house, bars, clubs and gymkhana:

no parking space shall be necessary up to a total covered area of 200.00 sq. metres. For covered area of more than 200.00 sq. metres one car parking space for every additional 200.00 sq. metres or part thereof shall be necessary;

(b) hotel and boarding house :

(i) 1(one) car parking space for every 5(five) guest rooms or part thereof shall be necessary for three-star, four-star and five-star hotels;

(ii) 1(one) car parking space for every 20(twenty) guest rooms or part thereof shall be necessary for other hotels and boarding houses;

(i i) for areas to be used as restaurant, dining hall, shopping area, seminar hall, banquet hall and similar purposes, one additional car parking space for every 200.00 sq. metres of covered area or part thereof shall be necessary;

(c) theatre, motion picture, house, city hall, skating ring, town hall, auditorium or similar other halls or such other places.

(i) having fixed seating arrangement :

one car parking space for every thirty seats shall be necessary;

(ii) having no fixed seating arrangement :
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

one car parking space for every 100.00 sq. metres of covered area shall be necessary;

(6) (a) For institutional occupancy, car parking shall be subject to the following provisions (parking space includes spaces for parking of cars, two-wheelers, three-wheelers, bi-cycles and the like): -

(i) hospitals and other health-care institutions run by Government, Statutory Bodies, Local Authorities:

(A) in institutions where beds are provided, one car parking space for every twenty beds shall be necessary;

(B) in institutions where beds are not provided, one car parking space shall be necessary for every 100.00 sq. metres of covered area.

(ii) hospitals and other health-care institutions not run by Government, Statutory Bodies, Local Authorities:

one car parking space for every 75.00 sq. metres of covered area or part thereof shall be necessary.

(b) The required number of car parking space shall in no case exceed 200.

(7) For educational occupancy, car parking shall be subject to the following provisions (parking space includes space for parking of cars, two-wheelers, three-wheelers, bi-cycles etc.): -

(a) no car parking space shall be necessary up to a covered area of 100.00 sq. metres used for administrative purpose;

(b) for covered area more than 100.00 sq. metres but less than 400.00 sq. metres used for administrative purpose one car parking space shall be necessary;

(c) for covered area of 400.00 sq. metres and above used for administrative purpose, one car parking space for every 400.00 sq. metres shall be necessary;

(d) for total covered area of more than 1000.00 sq metres one bus parking space for every 1000.00 sq. metres shall be necessary. Such parking space shall be in addition to the car parking space required for the
For industrial or storage or hazardous occupancy, car parking shall be subject to the following provisions (parking space includes spaces for parking of cars, two-wheelers, three-wheelers, bi-cycles etc.): -

(a) no car or truck parking space shall be necessary up to a total covered area of 200.00 sq. metres;

(b) for covered area of more than 200.00 sq. metres one truck parking space for every 1000.00 sq. metres subject to minimum of 1(one) truck parking space, shall be necessary;

(c) the required number of car packing space shall in no case exceed 50 and the required truck parking space shall in no case exceed 50.

51. Tall buildings (exceeding fourteen metres in height).

In Municipality or in Nagar Panchayat the building height shall not normally be more than 14.00 metres (fourteen). But in the case of any building exceeding 14.00 metres in height, the Local Body, for reasons to be recorded in writing and with the previous approval of the State Government, may sanction such proposal(s) as special case if not otherwise covered by any law for the time being in force. In such cases the following special rules shall be applicable in addition to other rules under the Act:

(1) no building exceeding 14.0(fourteen) metres height shall be allowed on private or public street of not less than 18.00 metres in width;

(2) for every category of building referred to in rule 49(2) and exceeding 14.0(fourteen) metres in height shall be a front open space of not less than 20% of the height of the building or 6 metres at its narrowest part, whichever is less:

provided that such open space for any building other than a residential or an educational building exceeding 14.0(fourteen) metres in height shall not be less then the open space specified under rule 49(2) in respect of such categories of buildings with a height of 14.0(fourteen) metres or less;

(3) (a) every building exceeding fourteen metres but not exceeding
18.0(eighteen) metres in height shall have a rear open space at ground along the entire width of the building forming an integral part of site of a minimum width of five metres;

(b) every building exceeding 18.0(eighteen) metres but not exceeding twenty-four metres in height shall have a rear open space at ground along the entire width of the building forming an integral part of the site of a minimum width of 8.0(eight) metres;

(4) (a) the minimum side open space of a building exceeding 14.0(fourteen) metres but not exceeding 18.0(eighteen) metres in height shall be 3 metres and 50 centimetres on either side or more;

(b) the minimum side open space of a building exceeding eighteen metres in height shall be 20% of the height of the building subject to the minimum of five metres and fifty centimetres on either side;

(c) in the case of a building of more than 24 metres in depth and not exceeding 18 metres in height one of the sides at least 4 metres in width;

(5) (a) in case the whole of one side or part of at least two sides of every room excepting bath, water-closets and store-room, is not abutting either the front, rear or side open spaces, it shall abut an inner courtyard whose minimum width shall be 30% of the height of the building or 3 metres, whichever is more;

(b) for ventilating water closet in bathroom such water closet or bathroom or kitchen or any room not intended for human habitation, if not opening on to front, rear, side or interior open space, shall be up to a ventilation shaft, the size of which shall not be less than the values given below:

<table>
<thead>
<tr>
<th>Height of building (metres)</th>
<th>Area of ventilation shaft (sq.metres)</th>
<th>Minimum width of shaft (metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above 14.00 but not more than 18.00</td>
<td>6.00</td>
<td>2.40</td>
</tr>
</tbody>
</table>
for building of height of more than 14.00 metres a mechanical ventilation system shall be installed besides the provision of ventilation shaft;

(c) if there be building other than boundary walls on not more than three sides of a court yard, the minimum width shall be 20% of the height of the building or 2.50 metres which ever is more;

(6) (a) for every building exceeding fourteen metres and a half, the Floor Area Ratio shall be as specified in the table below:

<table>
<thead>
<tr>
<th>Width of means of Access (metres)</th>
<th>Residential Building</th>
<th>Commercial Zone, if any</th>
<th>Other Zone</th>
<th>Institutional, Business Buildings</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Above 14.0 to 20.00</td>
<td></td>
<td></td>
<td>2.50</td>
<td>2.25</td>
</tr>
<tr>
<td>2. Above 20.00 to 24.00</td>
<td></td>
<td></td>
<td>2.75</td>
<td>2.50</td>
</tr>
</tbody>
</table>

(b) while calculating the floor area under this Chapter, the following shall be included namely :-

(i) stair cover not exceeding 2.4 metres in height,
(ii) lift machine room as per latest edition of the National Building code,
(iii) roof tanks with their support, the height shall not exceeding 1.8 metres,
(iv) chimney, ventilating, air-conditioning and service equipment attached to the building;
provided that the aggregate area of these structures mentioned at (i) to (iv) above shall not exceed one-third area of the roof upon which these are erected,

(v) the area of covered car parking spaces as may have been provided for the required number of car parking spaces in accordance with rule 50, and for this calculation the area required for one car parking space shall be taken as 20 sq. metres inclusive of all circulation spaces.

(7) for construction of steel towers, the criteria specified for buildings above 14.0 metres in height shall be followed.
Regulation for more than one building in one plot

52. Regulation for more than one building in one plot, existing building and the buildings under Govt. approved schemes :-

(1) (a) Every building on a plot containing more than 1(one) building shall abut an internal road connecting the means of access of the plot.

(b) The minimum width of such internal roads shall be 3.50 metres. Where internal road of 3.50 metres in width is not possible to be provided due to an existing building constructed prior to the enforcement of these rules, a building of not more than 8.0 metres in height may be allowed, provided that the width of the internal road shall not be less than 1.20 metres.

(c) The maximum permissible height of any building on a plot shall be determined by the width of the means of access on which the plot abuts according to the table given in sub-rule(3) of rule 48.

(d) The minimum width and the maximum length of all such internal roads shall be as prescribed in the table below:

<table>
<thead>
<tr>
<th>Width of means of access</th>
<th>Maximum length of the means of access</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>For means of access closed at one end</td>
</tr>
<tr>
<td>(i) 3.50 metres and above but not more than 7.00 metres</td>
<td>25.00 metres</td>
</tr>
<tr>
<td>(ii) Above 7.00 metres but not more than 10.00 metres</td>
<td>50.00 metres</td>
</tr>
<tr>
<td>(iii) Above 10.00 metres</td>
<td>No restriction</td>
</tr>
</tbody>
</table>

(e) In case the buildings within a plot which are not of the same occupancy, an individual building of any particular occupancy shall comply with the rules governing such occupancy except the provisions regarding ground
coverage which shall be in accordance with sub-rule(2) of this rule.

(2) Ground Coverage shall be as laid down below:

for plots measuring 5,000 sq. metres or more in area, the maximum permissible ground coverage shall be 45% for residential or education buildings and 35% for buildings of other use groups or for buildings with mixed occupancies:

provided that the provisions of rule 47 shall be applicable to plots measuring less than 5,000 sq. metres.

(3) open space for Building shall be as laid down below:

(a) every building shall have minimum external open space prescribed in Rule 49, provided that on these open spaces internal roads may be constructed.

(b) for plots measuring more than 5000 sq. metres in area, provision of 8% of the total area of the plot is to be kept as public open space. The width of each such open space shall not be less than 10.00 metres and each such open space shall abut a street having a width not less than 7.00 metres. The minimum area of each of such open space in one parcel shall be 400 sq. metres. This open space shall be in addition to the land required for providing the means of access to the individual plots as prescribed in rule 46.

(c) for plots measuring more than 25000 sq. metres in area provision of 7% of the total area of the plot shall be reserved for use for facilities like School, Health Centres, Market, Police Outpost with both Post Office, Power Sub-station, Transport Terminal, Water Treatment plant, Sewage Treatment plant and the like, such land shall abut a street having a width of not less than 10.00 metres in addition to the land necessary for means of access and for open spaces sanctioned in clause(b) of this sub-rule.

(4) The parking provision shall be the same as stipulated in rule 50.

(1) The provisions of these rules shall apply only in the case of an existing
building. Existing building, for this purpose, shall mean any building which was erected before the date of coming into force of these rules in accordance with a building plan sanctioned by a authority competent to sanction such building plan under the Tripura municipality Act, 1994 or any other law for the time being in force.

(2) In the case of existing building, -

(a) excepting storage buildings, where the open spaces required have not been provided an addition in the number of storeys, if otherwise permissible, may be allowed with a set back, provided such building continues with the same occupancy:

provided that no formal set back may be necessary up to a height of 8.0 (eight) metres for adding only one floor over an existing single storeyed residential building;

(b) the extent of the set back from the property boundary shall be such as to make the addition to the building conform to the provisions of rules 47 and 49;

(c) if any car parking space is required to be provided under these rules and no such car parking space can be provided in such existing building, the covered area allowable under the provisions of these rules shall be reduced by the area required for such car parking space which can not be provided in the said building;

Explanation.- For the purpose of calculation, the area required for one car parking space shall be taken as 20.00 sq. metres.

(d) the height of the building shall conform to the rules as indicated in rule 48 and in no case after addition the height shall exceed 14.0 metres;

(e) the addition to an existing building with residential occupancy shall not exceed 200.00 sq. metres in covered area;

(f) the addition to an existing building with educational occupancy shall not exceed the total covered area of the existing building;

(g) the addition to an existing building with other occupancies including mixed use building but excepting storage building shall not exceed 100.00 sq.
metres in covered areas;

(h) in case of partition of existing buildings common wall may be allowed as the partition line.

53.(a) **Provisions for Maintenance, Demolition of an existing building/structure:**

In case of any report(s) against an existing building/structure or part thereof or is older than 50 (fifty) years and is not safe for human habitation or any other purposes, a Joint Expert team, constituted by the competent authority, comprising expert(s) from ULB and PWD will verify that reported building/structure and submit a report to the competent authority regarding the latest structural condition of that building/structure or part thereof and the authority will take decision about its continuation of existence or demolition or necessary repairing works needed to be undertaken on the basis of the report of the Joint Expert team. In that case, if any safeguard measure or measures are required to be taken or it becomes necessary to demolish the reported building/structure, the owner(s) shall have to do it within the time-bound period at his/their own cost or the authority will take necessary measures accordingly.

54. **Provisions for buildings constructed under Government approved schemes:**

(1) Notwithstanding anything contained elsewhere in these rules the provision of this chapter shall apply in respect of matters provided therein, in the case of buildings constructed by Governments, or any of the statutory bodies under any Government approved scheme, for residential use of persons belonging to low income group or of industrial workers.

(2) The minimum size of a plot shall be less than 40 square metres and the maximum size of the plot shall not be more than 65 square metres.

(3) (a) No building shall be constructed on a plot if the width of the means of access to the site is less than 2.4 meters in general and 1.8 metres in...
case of Agartala Municipal area and 1.5 meters in case of any Nagar Panchayat area in special cases as mentioned in rule 46 (2)(b).

(b) No building exceeding 8.0 metres in height shall be allowed on a plot if the width of the means of access to the site is less than 3.5 metres.

(4) The maximum permissible ground coverage shall be 75% of the area of the plot.

(5) The maximum height of the building shall be 10 metres.

(6) The minimum front open space for a building, shall be 1.0 metre.

(7) The minimum rear open space for a building shall be 0.8 metre.

(8) The buildings may be of the row housing type and the maximum length of the building in a row shall be 50 metres. After every 50 metres of length of the building in a row, there shall be an open space of not less than 2.5 metres in width for the entire depth of the building; provided that such open space shall not be necessary if there is a street or passage at such location, the minimum width of which is 2.5 metres.

(9) No parking space within the plot shall be necessary.
PART VI
Requirements of Parts of Buildings

55. **Plinth.**
   (1) The plinth or any part of a building or any accessory building shall be so located with respect to the crest of the road level that adequate drainage of the site, in such situations, the stilted portion should be suitably stiffened to resist design earthquake forces assured and it shall in no case be at a height less than 60 centimeters.

   Provisions shall have to be followed as per IS Guide listed in Annexure. Suitably add provisions for "Low income housing (plinth max 40 Sq. meter) as per IS: 8888-1993 Guide for requirements for low-income housing".

   (2) Every inner courtyard shall be raised at least 15 centimeters above the level of the center of the nearest street and shall be satisfactorily drained.

56. **Habitable Room.**
   (1) No habitable room shall have an area less than 9.50 sq. metres having a minimum width of 2.40 metres, where there is only one room. In case of more than one room, one of these rooms shall be not less than 9.50 sq. metres with a width of 2.40 metres at the minimum and the others shall not be less than 7.50 sq. metres in area with a minimum width of 2.10 metres.

   (2) No habitable room shall have, a height of less than 2.75 metres measures from the surface of the floor to the lowest point of the ceiling or the underside of any slab:

   provided that in the case of any centrally air-conditioned building, the height of any habitable room shall not be less than 2.4 metres measured from the surface of the floor to the underside of any slab or false ceiling, as the case may be:

   provided farther that the height from the surface of the floor up to the
beam shall not be less than 2.4 metres;

provided also that in the case of any pitched roof the average height shall not be less than 2.75 metres and the minimum height at eaves level shall be 2.1 metres.

(3) All rooms in any buildings irrespective of their use group, utilized for human habitation shall conform to sub-rules (1), (2) and (3).

(4) Any room to be used as retail shop shall have a minimum clear height of 2.3 metres measured from floor to bottom of the ceiling or beam, whichever is lower;

57. **Roof.**

(1) The roof of a building shall be so constructed or framed as to permit effectual drainage of the rain water there from by means of sufficient rain-water pipes of adequate size, wherever required, and so arranged, joined and fixed as to ensure that the rain-water is carried away from the building without causing dampness in any part of the walls or foundations of the building or those of an adjacent building.

(2) The Local Body may require rain-water pipes to be connected to a drain or sewer through a covered channel formed beneath any street to connect the rain-water pipe to a road gutter or any other approved device.

(3) Rain-water pipes shall be affixed to the outside of the walls of the buildings in recesses or chases cut or formed in such walls or in such other manner as may be approved by the Local Body.

(4) Every terrace on the top most storey of any building shall have a common access and shall not be sub-divided.

58. **Kitchen.**

(1) No kitchen shall have a floor area of less than 4.5 sq. metres and width of less than 1.8 metres:

provided that if any kitchen is to be used for eating purposes also, such shall not be less than 9.5 sq. metres and the width shall not be less than 2.4
No kitchen shall have a height less than 2.5 metres measured from the surface of a floor to the lowest point in the ceiling or the underside of any slab except from the portion to accommodate any floor or any upper floor.

(3) Every room to be used as kitchen shall have —
   (a) unless separately provided with any pantry meant for the washing of kitchen utensils which shall land directly or through a sink to grouted and trapped connection to waste pipe;
   (b) an impermeable floor;
   (c) a window of not less than 1 sq. metre in area opening directly to an interior or exterior open space, or into any shaft;
   (d) a flue, if necessary;
   (e) a refuse chute for discharge of solid wastes. in case of any building exceeding 18.0(eighteen) metres in height.

59. Pantry.—
   (1) No pantry shall have a floor area of less than 3 sq. metres and a width of less than 1.4 metres.
   (2) Every pantry shall have —
       (a) a means of the washing kitchen utensils. if not provided in the kitchen, which shall lead directly or through a sink to grouted and trapped connection to any waste pipe;
       (b) an impermeable floor.

60. Bathroom and water closet.—
   (1) No bathroom shall have a floor area of less than 1.8 sq. metres, with with a width of less than 1.2 metres and a height less than 2.2 metres measured from the surface of a floor to the lowest point of the ceiling or the underside of any slab:
   provided that if it is combined bathroom and a water closet such floor area shall not be less than 2.6 sq. metres.
(2) No water closet shall have a floor area of less than 1.1 sq. metres and a width less than 0.9 metre.

(3) Notwithstanding the provisions of sub-rule (1) or sub-rule(2), the case of any building referred to in rule 54, -
   (a) an independent bathroom may have a floor area of 1.45 sq. metres;
   (b) a combined bathroom and water closet may have a floor area of 2.0 sq. metres, with a minimum width of 1.1 metres.

(4) Every bathroom or water closet shall –
   (a) be so situated that at least one of its walls shall open to an interior or exterior open space or shaft and shall have an interior or exterior open space or shaft and shall have an opening in the form of window or ventilator or louver not less than 0.37 sq. metre in area;
   (b) not be directly over any room other than a latrine or water closet or a washing place or a bathroom or a terrace unless it has a water tight floor;
   (c) have the platform or set made of water tight non-absorbent materials;
   (d) be enclosed by walls or partitions and the surface of every such wall or partition shall be finished with smooth impervious material to a height of not less than 1 metre above the floor of such room;
   (e) be provided with a door completely closing the entrance to it; and
   (f) be provided with an impervious floor covering with an impervious floor covering sloping towards any drain with a suitable grade and not towards any veranda or other room.

(5) No room containing any water closet shall be used for any purpose except, as a lavatory and no such room shall open directly into any kitchen or cooking space or pantry by a door, window or other opening.

61. **Loft** -

(1) A loft may be permitted in buildings of all use groups.

(2) The area of any such loft shall be restricted to 25 percent of the area of the
floor or any room other than inhabited room, provided that 100 percent of the area may be covered over any corridor.

(3) Maximum height between any loft and ceiling shall be 1.20 metres and the clear height below the loft shall not be less than 2.10 metres.

62. Ledge or land. –

(1) A ledge or land in a habitable room shall not cover more than 15 percent of the floor on which it is constructed and shall not interfere with the ventilation of the room under any circumstances.

(2) The ledge shall be provided at a minimum height of 2.1 metres from floor level.

(3) The maximum width of any ledge or land shall be 0.60 metre.

63. Mezzanine floor. –

(1) A mezzanine floor may be permitted only between the ground floor and first floor of any building.

(2) A mezzanine floor may be permitted over a habitable room provided that –

(a) it conforms to any standard for a habitable room as regards lighting and ventilation;

(b) it is so constructed as not to interfere under any circumstances with the ventilation;

(c) such mezzanine floor is not subdivided into smaller compartments;

(d) such mezzanine floor or part of it shall not be used as kitchen; and

(e) in no case a mezzanine floor shall be subdivided so as to make it liable to be converted into unventilated compartments.

(3) An area up to 25 percent of the covered area on the ground floor shall be allowed.

(4) The height of any mezzanine floor shall not be less than 2.1 metres.

64. Store room:-
No store room in any residential building shall have a floor area less than 1.5 sq. meters and a height of less than 2.1 meters.

65. **Garage.**

(1) No garage for cars shall be less than 2.5 metres x 5 metres.

(2) The minimum head room in a garage shall be 2.1 metres.

(3) The size of any garage where more than one motorcar is parked shall be calculated on the basis of the number of vehicles to be parked there.

(4) No garage for trucks shall be less than 3.75 metres x 10.00 metres with a minimum head room of 3.00 metres.

66. **Basement.**

(1) Subject to specifications, if any, made in this behalf under the Tripura Town and Country Planning Act, 1975, the Local Body may specify any area or ward or borough where the construction of any basement shall not permitted.

(2) A basement may be used as –

   (a) a parking space;

   (b) an air-conditioning plant room or room for other machines used for any building service or for other purposes;

   (c) a space for a stand by generator for power supply,

   (d) a storage space for household or other goods of non-inflammable nature,

   (e) a strong room or bank locker,

   (f) a dark room,

   (g) a stack room in any library, or

   (h) a business building, or mercantile building (retail), or assembly building, if it is air-conditioned.

(3) Outer walls of a basement shall not extend to the exterior open spaces as required under these rules.
(4) No basement or portion thereof shall be used for residential purpose.

(5) No kitchen, bathroom or water closet shall be permitted in any basement unless the sewer levels permit the same and there is no chance of back flow and flooding of sewerage. If permitted, such kitchen, bathroom or water closet shall be placed against an external wall of the basement, which shall also be the external wall of the building and shall be adequately lighted and ventilated. Detailed plans showing arrangement for drainage including pumping system shall be submitted in such cases.

(6) Every basement shall -

(a) in every part be at least 2.4 metres in height from the floor to the underside of the roof slab or ceiling or any false roofing;

(b) have adequate arrangement so that surface drainage does not enter the basement, and have adequate arrangement for pumping out water, if necessary;

(c) have water-tight walls and floors which shall be so designed that the effect of the surrounding soil and moisture, if any, is taken into account in design and adequate damp-proofing treatment is given;

(d) have access by means of two or more ramps and a staircase, which are separated from the main and alternate staircase providing access and exit from higher level floors, the width of each ramp shall not be less than 3.5 metres and the slope shall not be steeper than 1(one) vertical to 6(six) horizontal and the distance between the ramps shall be such as may be determined by the Municipal Chairman of the Local Body/ Nagar Panchayat

(e) in the case of such basement being used for a purpose as referred to in clause(g) of sub-rule(2), have sufficient numbers of access ways and exit ways so that the travel distance is not more than 15 metres;

(f) have adequate ventilation as required for any occupancy or use group under these rules:

provided that any deficiency may be met by providing adequate
mechanical ventilation in the form of bowlers, exhaust fans at the rate of one exhaust fan for every 50 sq. metres of the basement area, or by air-conditioning;

(g) comply with the requirements of the Tripura Fire Service Act as in enforced in the State of Tripura and the rules and the directions made or issued there under.

67. Chimney:—
(1) Any chimney shall conform to the requirements of the latest version of IS: 1645-1960 Code of practice for fire safety of buildings (general); chimneys, flues, flue pipes and hearths.

(2) Any chimney shall be built at least 0.9 metre above any flat roof; provided that the top of any chimney shall not be below the top of any adjacent wall and, in the case of a sloping roof, the top of the chimney shall not be less than 0.6 metres above the ridge thereof in which the chimney penetrates.

68. Parapet:—
A parapet wall and guardrails shall be provided on the edge of any roof terrace or balcony and it shall not be more than 1.5 metres in height.

69. Boundary wall:—
No boundary wall shall exceed 2 metre in height on the road side, the solid portion of compound walls shall not exceed 1.5 metres in height. The foundation of boundary wall, below ground level, shall not encroach upon any adjacent land outside the plot area.

70. Lighting and ventilation of room:—
(1) Every habitable room, kitchen, staircase and bathroom or water closet shall have, for the admission of light and air one or more apparatuses, such as windows, glazed doors and fan lights, opening directly to the external/air or into an open verandah.
(2) In any case when light and ventilation requirements are not met through day lighting and natural ventilation, the same shall be ensured through artificial lighting and mechanical ventilation as per the latest provisions of section 1 of Lighting and Ventilation of part VIII on Building Services of the latest edition of the National Building Code of India:

provided that the minimum aggregate area of the openings of habitable room and kitchens, excluding doors, shall in no case be less than one-tenth of the floor area.

(3) No portion of any habitable room shall be assumed to be lighted if it is more than 7.5 metres from the opening assumed for lighting that portion.

(4) The planning, design and installation of lighting and ventilation, electrical installations and fittings, air-conditioning and heating work, a caustics, sound insulations and noise control the number, type and installations of lifts and escalators shall be carried out in accordance with the provisions of building services of the latest edition of the National Electrical Code of India:

provided that for electrical installation in respect of any buildings the provisions of the latest edition of the National Electrical Code and Indian Electricity Rules shall apply:

provided further that the planning, design construction and installation of water supply, drainage, sanction and gas supply systems shall be in accordance with the provisions of planning services of the latest edition of National Code of India.
PART VII
Exit Requirements of Buildings

71. Definitions.

In this Chapter unless the context otherwise requires,-
(a) "exit" means a passage, channel or means of access from any building, storey or floor area to a street or other open space of safety and includes a vertical exit or a horizontal exit or an outside exit.

(i) "vertical exit" means an exit used for ascension or descension between two or more levels including stairways, smoke proof ramps, lifts, escalators and fire escapes.

(ii) "horizontal exit" means a protected opening through or around a fire wall or a bridge connecting two buildings.

(iii) outside exit" means an exit from the building to a street or to an open area leading to a street or to an enclosed fire resistive passage leading to a street;

(b) "travel distance" means the distance from the exit of any premises or a floor of a building to a place of safety, be it a vertical exit, a horizontal exit or an outside exit, measured along the line of travel.

72. Fire protection.

Every building for residential and educational purposes of more than 14.0 (fourteen) metres height, and all buildings of other uses shall be provided with adequate means of exit and all arrangements for protection in case of fire.

73. General exit requirements.

(1) The following general requirements shall apply to exit:

(a) all exits shall be free from obstructions;

(b) no building shall be altered so as to reduce the number, with or protection of exits to less than what is required under
these rules;
(c) exits shall be clearly visible and routes to reach each exit shall be clearly marked;
(d) all exits shall be properly illuminated;
(e) fire-fighting equipments shall, when provided along exits, be suitably located and clearly marked so as not to obstruct the exit way and there shall be clear indication from either side of the exit;
(f) alarm devices shall be installed to ensure prompt evacuation through exits;
(g) all exits shall provide continuous means of access to the exterior of a building or to an exterior open leading to a street or means of access;
(h) exits shall be so arranged that they may be reached without passing through another occupancy unit, except in the case of a building for residential and educational uses.

(2) An exit may be a door-way, corridor, passage way to staircase, ramp or a verandah or terrace which has access to the street or to the roof of a building. An exit may also include a horizontal exit leading to building at the same level.

(3) Lifts and escalators shall not be considered as exits.

(4) All basements shall have a minimum of 2(two) exits.

Explanation. -- Ramps to the basement shall be considered as exits.

74. Arrangements of exits.
(1) Exits shall be so located that the distance between 2(two) exits on the floor shall not exceed-
(a) 22.5 metres, in the case of a residential building or an educational building or institutional building or hazardous building; and
(b) 30 metres, in the case if an assembly building or a business building or a mercantile building or an industrial building or a
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

storage building.

(2) For floors with sprinklers, which are not part of requirements for the floor and occupancy, the distance in sub-rule(1) may be increased by 50 percent.

(3) The distance to an exit from the dead end of a corridor shall not exceed half the distance specified in sub-rule(1), except in an educational building or an assembly building or an institutional building in which case it shall not exceed 6 metres.

(4) Whenever more than one exit is required for any room space or floor of building, exits shall be placed as remote from each other as possible and shall be arranged to provide direct access in separate directions from any part in the area served.

75. **Requirements regarding staircase.**

All building referred to in rule 72 shall be provided with such number of staircase as the Local Body require. Under no circumstances, the number of staircases shall be less than 2(two) in the case of a building of more than 14.0(fourteen) metres in height and one of them shall be on the external face of the building.

76. **Minimum width provisions for Staircase.**

The following provisions for minimum width for staircase(s) shall be made:

(a) for each stairway in a residential building having not more than 2(two) tenements per floor, the minimum width shall be -

(i) 0.90 metre in the case of a building having above 11 metres in height.

(ii) 1.05 metres in the case of a building having above 11 metres and up to 14.0 metres in height.

(iii) 1.25 metres for primary stairway in the case of building above 14.5 metres in height.
(b) every additional tenements per floor to be served by the same staircase. The width of each stairway shall be increased by 0.15 metre, provided that for buildings constructed under the each of stairway shall not be less than 0.90 metre.

(c) for each stairway in institutional or mercantile buildings, the minimum width shall be 2.0 metres;

(d) for each stairway in educational or business or assembly buildings other than theatre, motion picture house, city hall, dance hall, auditorium, exhibition hall or similar other halls or such other places, the minimum width shall be 1.80 metres;

(e) (i) for assembly buildings not included in clause (b) above, the minimum width of each stairways shall be 1.80 metres where not more than 300 persons are to be accommodated,

(ii) for the accommodation of more than 300 persons, the minimum width of stairway as at (a) above shall be increased by 0.30 metre for every additional 100 persons or part thereof over 300 persons,

(iii) notwithstanding anything contained in sub-clause(ii), instead of a single staircase, corridor or passageway of the width prescribed by the said sub-rule, there may be two or more staircases, corridors or passageways as may be sufficient for the number of persons that can accommodated in the building, each having a width as prescribed in sub-rule(i);

(f) for all other buildings, the minimum width of each stairway shall be 1.50 metres;

(g) the minimum width of a passage or corridor shall be as follows: -

(i) for passage connecting vertical exits and the apartments/ units, the width shall not be less than the width of each stairways specified in clause(a) to (e) except for mercantile business buildings and assembly buildings;

(ii) for a passage within a apartment, the width shall not be less than 0.90 metre;
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

(iii) for a passage giving access to shops in a mercantile building, the width shall not be less than 2 metres if the shops are on one side only, and 3 metres if the shops are on both sides;

(iv) for a passage in a business building, the width shall not be less than 2.50 metres;

(v) for a passage in an assembly building, the width shall not be less than that as derived under sub-clause(i),(ii) and (iii) of clause (e).

77. **Provisions for doors for an assembly room or hall**.-

The doors of a room or a hall, where groups of people congregate or gather in any building, shall be made to open outside shall be affixed thereto. There shall be at least 2(two) such doors in every such room or hall if not more than 300 persons are intended to be accommodated therein and an additional door shall be provided for every 100 persons or part thereof in excess of 300 persons. The width of every such door shall not be less than 1.80 metres.

78. **Other requirements.** -

In respect of matters relating to fire prevention and fire protection, for which provisions have not been made in this chapter, the provisions of the latest edition of the National Building Code and the latest edition of the National Electrical Code shall apply.

79. **Consultation with the Director of Fire Services before granting permission to erect a building**.-

No permission for erection, addition to or alteration of any building other than a residential building or an educational building of less than 14.0(fourteen) metres in height shall be granted unless the Local Body in consultation with the Director Fire Service of the Government of Tripura or any officer specially empowered by the director for the purpose is satisfied about the provisions or means of exits and about the arrangements for protection against fire proposed for the building.
79.(a) **Erection of Hoarding, Signboard etc.:**

No hoarding, signboard or any permanent/temporary structure to be used in commercial or other purposes in any building or attaching two or more buildings shall be allowed without the prior permission of the respective ULB.

**30. Requirements for special occupancies under any other law in force:**

Notwithstanding anything contained in these rules a building shall comply with special requirements, if any, laid down in Factories Act, 1948 (63 of 1948) or in any other law for the time being in force in relation to such building.
PART VIII

Structural Design

81. Structural design.-

The structural design of foundation masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall be in accordance with the provision of loads concrete, foundation, steel reinforcement wood and masonry specified in the latest edition of the National Building code of India and relevant codes of Bureau of Indian Standards as listed in Annexure under the heading “Additional Provisions in Building Regulatory/Eyelaws for structural safety in natural hazards prone areas”.

82. Quality of materials and workmanship.-

All materials and workmanship shall be of good quality conforming generally to the accepted standards of the Public Works Department of the Government of Tripura or Indian Standard Specifications as indicated in part V on Building Materials and part VII on Constructional practices and safety of the latest edition of the National Building code of India.

83. Alternative materials, method of design and construction.-

The Local Body may approve any alternative material or method of design or construction if the competent authority of the ULB is satisfied that such alternative is satisfactory and conforms to the provisions of the relevant parts of the National Building Code of India regarding materials, method of design and construction and that materials, methods of design or work are for the purpose intended equivalent to those specified in the code in quality, strength, compatibility, effectiveness, fire and water resistance, durability and safety.

84. Tests.-

Whenever there is insufficient evidence of compliance with the provisions of these rules or there is evident that any claim for alternative materials, or
design, the Local Body may require tests to be made sufficiently in advance or require performance certificate from a body authorized by a state or central government, as proof of compliance and such tests shall be made at the expenses of the owner and in such manner as the Local Body may direct.
Building and Plumbing Services

35. Building Services. —

(1) The planning, design and installation of electrical fittings, air-conditioning and heating work, installation of lifts and escalators shall be carried out in accordance with the provisions of Lifts and Escalators on Building Services of the latest edition of the National Building Code of India. For electrical aspects of building services the provisions of the latest edition of National Electrical Code shall apply.

(2) The number of types of lifts to be provided in educational building shall be as specified in the latest edition of National Building Code of India.

(3) Electrical installation in respect of any building exceeding 14.0 (fourteen) metres in height shall conform to the provisions of the latest edition of National Electrical Code.

36. Plumbing Services. —

The planning, design, construction and installation of water supply, drainage and sanitation and gas supply system shall be in accordance with provisions of the Water Supply, Drainage and Sanitation, Gas supply on Plumbing Services of the latest edition of National Building Code of India. Septic tank, pits of pit privy shall be so located in a premises or holding, that the same is easily accessible from the means of access the plot.

37. Single and outdoors display structures. —

(1) The construction of advertising signs and outdoor display structure shall be in accordance with the provisions of the latest edition of the National Building code of India.

(2) Every building shall display in a prominent place on the front side, the premises number as assigned to it by the Municipality /Local Body and the street name, so as to be conveniently visible from the street.
88. **Special provision.** —

Notwithstanding anything contained elsewhere in these rules, the special provisions of the this part shall apply only to the Municipalities or Nagar Panchayats in the hill areas or to supplementing, the other provisions elsewhere in this rule in there application to those Municipalities or Nagar Panchayats in the hill areas. Anything not covered under the special provisions shall be guided by the provision made elsewhere in this rule or the Act.

88(A). For provisions not specifically covered in this part related provisions of other parts will apply.

89. **Power to relax rules.** -

Notwithstanding anything contained in these rules, a Municipality / Local Body or other concerned authorities may for reasons to be recorded in writing and with the previous approval of the State Government relax any provision of these rules for dealing with a case in a just and equitable manner.

90. **Criteria of using a piece of land as building site.** —

(1) No piece of land shall be used as a building site unless the Local Body is satisfied that:

(a) land record is in conformity with the proposed construction keeping in view specified land use, if any;

(b) the site of such building abuts an all weather public street, a projected public street or a private street/ footpath, passage and is not less than 1.50 metres wide at any part, duly sanctioned and constructed and recorded in the Books of Municipality/Nagar Panchayat in accordance with the provisions of the Act or any other law in force immediately before the commencement of the Act.

provided that, no building shall be erected so as to deprive any other building or buildings site of the means of access as specified above;
(c) the site is at least 100 sq. metres in area for residential purposes and 40.0 sq. m in area for other than residential purposes.

(d) the land is capable of being well drained by means of drainage facilities leading to the existing Public drainage, channel or natural jhora;

(e) the site is reasonably secured from danger from hillside slips from above, below, or the sides;

(f) the soil of the site is likely to sustain the construction of a building thereon; and for sites with inclinations of 30° and above or proposed building above 6.5 metres in height or 500 sq. metres in coverage, such sustainability shall be justified, at the cost of applicant, by prior testing of soil and certification of stability of slopes and buildings conforming to the relevant codes of Bureau of Indian Standards including

IS 12070: IS Code of practice for design and construction of shallow foundation on rock.

IS 14243 (Part I & II): Selection and development of site in hill areas guidelines;

in addition to other relevant Indian Standards.

A competent geo-technical engineering organization or firm, recognized by the Local Body, shall carry out detailed geo-technical investigations, testing and certification in such cases.

Explanation: Soil will also include rocks, boulders laterite etc.

(g) the site does not contain any portion which forms a component of the open spaces prescribed under the regulation for any other building site thereof.

(h) (i) no part of the land is located within 200 metres from the boundary of a sinking or probable slip zone, designated in a meeting by the Local Body.

(ii) within an area of distress or possible unequal settlements with wide fissures, regular cracks, faults, voids, rock, debris or landslides caused by subsidence or erosion, filling and disposal or organic materials, or;

(iii) it is located within an area showing high water table and fully saturated soil with a possibility of liquefaction and settlement on
Tripura Gazette, Extraordinary Issue, December 15, 2004 A.D.

(iv) exposure to earthquakes or of water seepage in the foundation and erosion, or,

any other vulnerable area identified by the Local Body as unsafe for environmental, geological, wind, drainage or any other reasons;

(l) no piece of land is located within five metres in any direction of the outside edge of such water courses;

(j) adequate drainage measurement and protection work as specified in rules shall be taken by the applicant at his own cost if it is located on the permanent shadow zones of ridges and spurs, at the bottom of the valleys or gorges or located by nature of its orientation in a zone as identified by the Local Body to be inadequately sunlit so as to make it unfit human habitation, if any;

(k) the side has not been subject to repeated blasting or, was a former quarry;

(l) where the side is within 5.0 (five) metres of any side of a tank, the owner will take such measures as well prevent any risk of the drainage from such building passing into the tank;

(m) where the site is within 5.0 (five) metres of any side of a tank, water reservoir, jhora/ natural spring, water source or natural drain or within 2.0 (two) metres from either side of water pipe, sewer line and / or other such underground utilities, the owner shall take such measures at his own cost, which shall prevent any risk of damage and / or landslide thereto by construction of such buildings. The distance shall be measured from outside edge of the jhora/drain / pipeline etc. as the case may be taken by the owner, at his own cost if the side is within 30 metres of jhora;

(n) no piece of land shall be used as building site if it is located on the permanent shadow zones of ridges and spurs at the bottom of the valleys or gorges or located by the natural or its orientation in a zone as identified by Local Body to be inadequately sunlit so as to make it unfit for human habitation.
(2) No piece of land located in central business area as determined by the Local Body or in sinking zone or areas of distress with cracks caused by subsidence and/or slides or any other areas identified by Local Body with reasons to be recorded in writing, shall be used as a building site without prior approval of the State Government.

(3) No piece of land where a closed, sick or other industry was located or is in operation, shall be used as site for construction of any building, other than an industrial building, without the prior approval of the competent authority.

91. Application for approval of sites and for permission to construct or reconstruct building other than huts.-

(1) Before submission of the building plan, approval of the building site has to be obtained.

However, the applicant may simultaneously submit the site plan and building plan to the Municipality/ Nagar Panchayat for approval at his own risk and cost. But the Municipality/ Nagar Panchayat shall consider the building plan submitted for approval only after the site plan is approved. In case the site is not approved, the submitted building plan shall also be treated as not approved.

(2) Every application, specified in sub-rule(1) submitted in Form A, shall state inter alia the proposed use of the land as per use group provided in this rules.

(3) Every application, specified sub-rule(1) shall be accompanied by a site plan in triplicate and the reports/recommendations of tests for soil and stability of slopes, as and where applicable under Rule 90 and a fee as may be determined by the Municipality/ Nagar Panchayat. The site plan shall be drawn to scale of not less than 1(one) centimeter to 6.0(six) metres and shall be signed by the applicant and by the licensed Building Planner or Architect as required under Rule 94 with a certificate to the effect that the site has been inspected personally by the Licensed Building Planner or the Architect, as the case may be.

(4) Every site plan specified in sub-rule(3) shall show or state on the body of the sheet showing the site plan the following:
(a) the boundaries of the site and of the owner thereof with number assigned to plot / premises;
(b) the position of the site in relation to neighboring streets with dimensions;
(c) the name of the street on which the site abuts;
(d) the position of the building and of all other buildings including existing buildings (if any) which the applicant intends to erect upon his contiguous and referred to in clause (a) in relation to-
   (i) the boundaries of the site and, in case where the site has been sub-divided, the boundaries of the portion owned by the applicant and also the portions owned by other owners, and
   (ii) all adjacent streets, buildings and premises within a distance of 12.00 metres of the site and of the continuous land (if any) referred to in clause (a);
(e) the use or occupancy of all the buildings;
(f) the direction of North point;
(g) the means of access from the street to the building and to all other buildings (if any) which the applicant intends to erect upon his contiguous land referred to in clause (a);
(h) the schematic position and approximate height and the number of the storeys of all other buildings within 12.00 metres from each side of the site;
(i) the free passage or way in front of the building;
(j) the width of the street (if any) in front and at the rear of the building;
(k) the means of drainage of the proposed building leading to existing public drains or drainage channels with their location in relation to the site;
(l) the means of drinking water supply to the proposed building indicating the source and the distance from the site including the route through which the pipeline will be laid, if piped water supply will be achieved;
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

(m) the means of power supply to the proposed building on the site, indicating the route through which power supply will be achieved;
(n) areas of distress;
(o) such other particulars as may be specified by the Local Body;
(p) the location of power line, water line, sewer line, natural drainage channel / jhora, road side drain, protective works;
(q) location of land slides, if any on or near the site in hill areas detected during reconnaissance. The Local Body shall come to ensure that the site is away from the slide zone or area of distress;
(r) on a sloping site in hill areas, proposals, for diversion of the natural flow of water coming from uphill side of the building away from the foundation.

92. Sub-division of plots. –

(1) No sub-division of any plot within the municipal area or Nagar Panchayat area, shall be undertaken without prior approval of the respective ULB.

(2) Generally –

(a) a plot to be sub-divided shall be treated as mother plot;
(b) sub-division shall not be allowed if the mother plot abuts an all weather means of access having a width of less than 2.00 metres for plots having area less than 500 sq. metres and width not less than 3.0 metres for plot having area more than 500 sq. metres, provided that an emergency vehicular access (min. 3 m wide) shall be available within a distance of 50 metre from the mother plot;
(c) every individual plot obtained by sub-division of the mother plot shall abut a means of access having width of not less than 2.00 metres;
(d) these rules shall not apply to a scheme for Economically Weaker Section and Low Income Group Housing approved by the Government;
sub-division may be allowed on the condition that the following facilities shall be provided by the owner at his own cost to the satisfaction of the Local Body:

(i) complete drainage facilities in accordance with provisions made elsewhere for the hill areas, ensuring drainage of such individual plot and of the means of access and passages leading to existing public drains or natural drains or natural drainage channels,

(ii) all weather means of access with related protective works, if necessary along with street lighting,

(iii) sanitary facilities including sewage and garbage disposal facilities,

(iv) water supply facilities,

(v) electricity and electrification facilities,

(vi) all individual plots as well as the means of access and infrastructure provided shall be accompanied by complete protective measures in accordance with provisions made elsewhere for hill areas in these rules.

(f) no permission for sub-division of a plot of land shall be granted unless each sub-divided plot is at least 100 sq. metres in area in residential buildings and 40.0 sq. m for other than residential building;

(g) no sub-division of plot shall be granted unless a detailed layout plan or the area proposal to be sub-divided is submitted before the Municipality / Nagar Panchayat duly integrating the site layout plan with the general use of the land in the adjoining areas. The existing street pattern is also other physical infrastructural facilities like drainage, sewage, water supply, electric supply with location of high tension or low tension electric line with poles are also required to be shown.
(3) The mother plot shall abut an all weather means of access conforming to the conditions specified below:

(a) the means of access shall have a width of not less than 2.0 metres, for plots having an area less than 500 sq. metres and a width not less than 3.0 metres for plots having area more than 500 sq. metres;

provided that an emergency vehicular access (min. 3 m wide) shall be available within a distance of 100 m from the mother plot;

(b) the minimum permissible width for any given length of means of access for sub-divided plots shall be as given in the following table:

<table>
<thead>
<tr>
<th>Length of internal road</th>
<th>Minimum width of means of access</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 25.00 metres</td>
<td>1.5 metres (pedestrian pathways only)</td>
</tr>
<tr>
<td>Above 25.00 metres but below 50.00 metres</td>
<td>3.0 metres</td>
</tr>
<tr>
<td>Above 50.00 metres but below 100.00 metres</td>
<td>4.5 metres</td>
</tr>
<tr>
<td>Above 100.00 metres</td>
<td>6.00 metres</td>
</tr>
</tbody>
</table>

(c) sub-division of a mother plot measuring more than 500 sq. metres in area shall only be allowed if a proportion of the total area of the mother plot is developed as public amenities or open space, as specified in the table below. This shall be in addition to the land required for providing the means of access to the individual plots obtained by sub-division of the mother plot as specified in this rule.

<table>
<thead>
<tr>
<th>Size of plot to be sub-divided</th>
<th>% of area to be reserved for community purpose (excluding roads)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above 2000 sq. metres and below 5000 sq. metres</td>
<td>7.5</td>
</tr>
<tr>
<td>5000 sq. metres and above</td>
<td>10.0</td>
</tr>
</tbody>
</table>

Moreover, each such space in a single parcel shall have minimum area of 150 square metres and a minimum width of not less than 3.00 metres; and each such open space shall abut a means of access as specified in sub-rule.
(3) of this rule.

(4) For mother plots measuring more than 5000.00 sq. metres in area, subdivision may be allowed if an additional 5(five) percent of the total area of mother plot is reserved for use for facilities like school, health centre, market, police outpost, milk booth, post office, power sub-station, transport terminal, water tank for fire fighting/ water treatment plant and the like, such land abut a means of access as specified in this rules. This is in addition to land necessary for means of access as specified in sub-rule (3) and for public amenities and open spaces specified in this rules.

93. Preparation of plan and supervision of execution of work.-

(1) Every owner who intends to erect, re-erect, add to or alter any building shall get its plan prepared and structural work designed and supervised by an Architect/ Structural Engineer/ Licensed Building Planner as required under Rule 94, while submitting the plan the Architect/ Licensed Building Planner/ Structural Engineer should certify to the effect that site has been personally inspected while planning for building and to designing the structural members, as well as has taken into account the findings and/or recommendations of stability analysis as well as soil tests performed as and when necessary under this rule.

(2) In all such cases, the Licensed Building Planner/ Structural Engineer or Geo-technical Engineer shall have to be empanelled with the Municipality / Local Body.

(3) The name, address and license or empanelment number of the persons so employed and serial number in the case of Architect shall be stated in the application in respect of such building.

(4) In case of building plans/site plan submitted by Central or State Government or by organization controlled by Central or State Government, if the plans are prepared and submitted under the signature of the Government Engineer or architect, who are employees of the applicant organization, the rule 93(1) shall be applicable.
94. **Engagement of technical personnel:**

(1) Every person who intends to erect, re-erect, add to or alter any building shall, subject to the provisions of the Act and these rules, engage —

(a) for all buildings up to 4.50 metres in height, a technical person having a diploma in Civil Engineering/Architect with at least 2 years experiences and having the rank of a licensed Building Planner for planning, design and construction of the building foundation and superstructure and for all buildings above 4.50 metres but below 8.00 metres in height and for erection involving piling works, deep foundation or construction of basement or any other underground structure thereto, a licensed Building Planner having a degree in Civil Engineering/Architect with at least 2 years experiences and/or an Architect and a Structural Engineer and a Geo-technical Engineer for conducting soil and other tests as required under rule 93(1), planning, design and construction of the building foundation and superstructure for all other buildings above the height of 8.00 mts. but below 14.00 mts. in height.

(b) A licensed Building Planner shall have —

(i) a degree in Civil Engineering or Architecture from a recognized university or its equivalent qualification recognized by the Government and shall not have less than 2(two) years experience in planning, design and execution of building works including sanitary and plumbing works related to building under similar geo-technical conditions, or

(ii) a diploma in Civil Engineering or Architecture from a recognized university or its equivalent qualification recognized by the Government and shall not have less than 5(five) years experience in planning, design and execution of building works including sanitation and plumbing works related to buildings under similar Geo-technical conditions;

(c) a Structural Engineer must have a Degree in Civil Engineering from a recognized university or its equivalent with at least 5(five) years experience (including two years in hill areas) in structural design;
(d) A Geo-technical Engineer must have a degree in civil engineering from a recognized university or its equivalent with at least 2(two) years of experience in soil and foundation engineering under identical soil/slope/geo-technical conditions.

(2) The Licensed Building Planner, the Architect, the Structural Engineer and the Geo-technical Engineer will work in association with one another and will be individually and/or collectively responsible for ensuring the safety of the building structure and its foundation.

(3) The Licensed Building Planner, Structural Engineer or a Geo-technical Engineer is also required to be empanelled with the Municipality/Nagar Panchayat.

(4) In case of death, resignation, removal of Licensed Building Planner, Architect, Structural Engineer, Geo-technical Engineer or, as the case may be, a fresh engagement shall be made forthwith and shall be notified to the Chairman of the Municipality/Nagar Panchayat. No work shall be carried out in the intervening period, if any.

(5) The validity of any engagement made under this rule shall lapse, in the case of an Architect with the lapse of validity of registration granted under the Architect's Act, 1972(20 a 1972) or in case of a Structural Engineer and a Geo-technical Engineer with the lapse of empanelment, or in the case of a Licensed Building Planner, with the lapse of the validity of license.

95. **Permissible height of building.**

(1) (a) The following appurtenant structures shall not be included in the height of the building:

i. stair cover not exceeding 2.40 metres in height;

ii. lift machine rooms as per the latest edition of the National Building Code;

iii. roof tanks and their supports, the height of support not exceeding 1.50 metres;

iv. chimneys;

v. parapet walls not exceeding 1.50 metres in height;

vi. ventilating, air-conditioning and other service equipments;

vii. height above mid-point between eaves level and ridge level.

(b) The aggregate area of the structures mentioned in clause (a) (except (vi)) shall not exceed one-third of the area of the roof upon which these are erected.
(2) The maximum permissible height of a building as well as its permissible floor area shall be regulated by the width of the surrounding open space in the same holding plus the width of its means of access, depending on the type of building a use as per the table below:

<table>
<thead>
<tr>
<th>Floor Area Ratio (R.A.R.)</th>
<th>Width of means Of access plus</th>
<th>width of front open space</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Upton</td>
<td>3.0 -</td>
</tr>
<tr>
<td></td>
<td>3.0 -</td>
<td>5.0 m</td>
</tr>
<tr>
<td>Residential</td>
<td>1.0</td>
<td>2.0</td>
</tr>
<tr>
<td>Commercial, Public &amp; other Uses</td>
<td>1.0</td>
<td>2.0</td>
</tr>
<tr>
<td>Maximum permissible height</td>
<td>4.5 m</td>
<td>6.5 m</td>
</tr>
</tbody>
</table>

Provided that in case a building is more than 14.00 metres in height prior approval of the State Government is required to be obtained.

For building of residential (excluding a height of 4.5 metres), commercial, public and other uses the means of access of at least 3 metre wide should be available within a distance of 100 metres of foot-path length from the proposed plot.

(3) The local body may, if necessary, restrict the height of building in any area within the municipal limits, below that provided above for reasons to be recorded in writing.

96. **Ground coverage**:-

The maximum permissible ground coverage for buildings when a single building is proposed for a plot, shall be regulated by the plot size, depending on the type of building use as given in the table below:
maximum permissible ground coverage

<table>
<thead>
<tr>
<th>Plot Size</th>
<th>Residential and Education Uses</th>
<th>Commercial, Public and other uses</th>
</tr>
</thead>
<tbody>
<tr>
<td>100 - 400 sq.m.</td>
<td>70%</td>
<td>60%</td>
</tr>
<tr>
<td>400 - 1200 sq.m.</td>
<td>60%</td>
<td>50%</td>
</tr>
<tr>
<td>Over 1200 sq.m.</td>
<td>50%</td>
<td>40%</td>
</tr>
</tbody>
</table>

97. **Open spaces for building**.

(1) Generally:

(a) every room intended for human habitation shall abut an interior or exterior open space or an open verandah open to such interior or exterior open space. Open spaces shall be areas forming integral parts of the plot at ground level and shall be open to sky without any projection or overhang excepting cornices, chaaj or weather-shades of not more than 0.50 metre width;

(b) every building shall have exterior open spaces comprising front open space, and side open spaces. The minimum width prescribed for front open space, rear open space and side spaces shall be provided along the entire front, rear and side faces of the building respectively. For this purpose the front of the building shall be that face of the building which faces the means of access of the building and the rear of the building is that face of the building which is farthest from the means of access. These provisions shall also be applicable to each individual building separately when a plot contains more than one building. In the case of a corner plot located at the crossing of more than one street or passage, the rear of the building shall be deemed to be the face of the building, which is farthest from the widest of all such streets and/or passages;

(c) open spaces prescribing to one site cannot be taken for another site. No building shall at any time be erected on any open space prescribed in these rules for a building and from part of the site thereof, nor shall such open space be taken into account in determining the area of any open space required under these rules for any other building.

(d) If the front open space is 3.00 metres or more in width a Gate Goomti for security purpose may be allowed in the said open space. The covered area of
such Goomti shall not in any case exceed 3.00 sq. m. and the height of such
Goomti shall not exceed 3.00 metres. The covered area of the Gate Goomti
shall not be included in calculation of ground coverage.

(2) The minimum front, rear and side open spaces shall be provided along the
entire facade/sites of the building as given in the table below:

<table>
<thead>
<tr>
<th>Minimum width of open space in metres</th>
<th>Front</th>
<th>Rear</th>
<th>Side</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential and Educational uses</td>
<td>1.5 m.</td>
<td>1.5 m.</td>
<td>1.5 m.</td>
</tr>
<tr>
<td>Commercial, Public and other uses</td>
<td>2.5 m.</td>
<td>2.5 m.</td>
<td>2.5 m.</td>
</tr>
</tbody>
</table>

provided that the minimum clearance, on all the sides between a
building wall and the toe of a retaining or other protective wall shall be
1.50 metres, except on the side where the septic tank shall be installed, in
which case, the minimum clear distance of 2.1 metres shall be provided:

provided further that for mixed use buildings, the minimum front
open space shall be the one applicable for that particular occupancy which
gives the provision of the minimum front open space in these rules,
provided that for a building more than 11.00 metres in height the Minimum
open spaces provided in sub-rule(2) above shall be increased by 0.3
metres in all cases.

(3) Notwithstanding anything contained elsewhere in this rule in the case of a
building with a septic tank, a side open space of 2.1 metres shall be provided on
any one side of the building for the provision of the said septic tank.

(4) In the case of a building more than 25.0 metres in depth, a passage of
width not less than 3.5 metres shall be provided along the entire depth of the
building.

(5) For plots of size not more than 65(sixty five) sq. metres minimum side
space of 0.90 metre may be allowed on each side provided the building height
does not exceed 6.5 metres.

(a) notwithstanding anything contained in this rule, the minimum distance
across the side open space from every new building to an existing building with a door or window opening shall be 1.80 metres;

(b) notwithstanding anything contained in this rule the minimum width of side open space for an industrial or storage or mercantile (wholesale) building shall be 3.50 metres;

(c) in the case of a building more than 24.00 metres in depth on a plot abutting any street a passage along the side depth of the building shall be provided and the minimum width of such passage shall be 4.0 metres.

(6) The interior open space shall be as follows:

(a) For inner courtyard -

in case the whole of 1(one) side or part of at least 2(two) sides of every room excepting bath, water closets and store-room is not abutting either the front, rear or side open spaces, it shall abut an inner courtyard whose minimum width shall be 30% of the height of the building or 3.00 metres whichever is more.

(b) for ventilation shaft, that is to say -

for ventilating water closet bath room and kitchen such water closet or bath room or kitchen if not opening to front side, rear or interior open space, shall open on to a ventilation shaft, the size of which shall not be less than the values given below:

<table>
<thead>
<tr>
<th>Height of building (metres)</th>
<th>Minimum Area of ventilation shaft Sq. Mts.</th>
</tr>
</thead>
<tbody>
<tr>
<td>up to 11.00</td>
<td>10.50</td>
</tr>
<tr>
<td>Above 11.00 but not more than 12.50</td>
<td>3.00</td>
</tr>
<tr>
<td></td>
<td>1.20</td>
</tr>
</tbody>
</table>

Note: No chajja shall be allowed in the ventilation shaft unless the width of shaft is 2.40 metres or more.

(c) the minimum width shall not be less than 20% of the height of the building or 2.50 metres, whichever is more.
(7) The service rooms shall have access by means of 2(two) passages of staircases, providing access and exit from higher and lower level floors, the width of which shall not be less than 1.2 metres and the slope shall not be steeper than one 1 : 1 and so located that the travel distance on any floor up to any such access or exit is not more than 15.0 metres.

(8) Mezzanines are to be used strictly for purposes other than habitation or kitchens and eating places and may be provided between any 2(two) floor shall be permitted with a minimum clear height at every part of at least 2.0 metres measured from the floor to the lower most point on the underside of the roof, slab, beam or false ceiling. The area of such mezzanines shall be included in floor area in all calculations.

98. **Access, circulation and parking.**

(1) Every plot shall abut a means of access which may be a public street or private street or passage, the minimum width of which shall be as specified in this rule.

(2) Any building which in full or part is put to assembly occupancy for the purpose of theatre, motion picture house, city hall, skating-rink, auditorium, exhibition hall or for similar other purposes shall not be allowed on a plot located within 50 metres of the junction of 2(two) streets, the width of each of which shall be a minimum of 8.0 metres.

(2) Every building on a plot having more than one building shall abut an internal road connecting the means of access of the plot and such roads shall conform to the requirements of internal roads specified in rule 52(1).

<table>
<thead>
<tr>
<th>Number of car parking Spaces as per Covered Area of plot and Use Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential and Educational uses</td>
</tr>
<tr>
<td>Commercial, Public and other uses</td>
</tr>
</tbody>
</table>

In case of a plot having more than one building or use, parking requirements shall be calculated according to the proportionate floor area of each.
building or use group, as the case may be.

(4) For plots abutting non-vehicular means of access less than 3.0 metres in width, car parking space need not be provided within the plot area but space with vehicular access has to be identified and owned by applicant for the required parking /garage space, as per this rule.

(5) The parking space for each vehicle shall be accessible from the means of access, either directly or through a driveway or internal circulation, aisle, the width of which shall not be less than 3.5 metres for cars and 5.0 metres for trucks and the gradient of which shall not be more than 1:6.

(6) The minimum size of a car parking space shall be 2.50 metres x 5.00 metres and that for a truck or bus parking space shall be 3.75 metre x 10.00 metres. These spaces do not include the area of circulation, internal roads, aisles and driveways, and standards for those shall be guided by provisions in the National Building Code.

(7) No garage for car shall be less than 2.5 metres x 5.00 metres (clear size) with a minimum head room of 2.0 metres and no garage for truck shall be less than 3.75 metres x 10.00 metres (clear size) with a minimum head room of 3.50 metres.

(8)(a) An internal road must be so constructed as to have a slope inwards/towards the hillside. Such slope must be not less than the gradient of the road;

(b) where required, the inner and outer edges of an internal road must be protected by protective walls of such number and placed in such positions as the Local Body may direct and constructed in accordance with the specifications in this rule.

99. **Drainage measures.** -

(1) (a) An open drain must be provided on the inner side of an internal road constructed in accordance with the specifications in rule 98.

(b) An effective slope and drainage system shall be maintained at all times on the developed ground after slope cutting or filling, during and after
development as per this rules on any side:

(c) the drainage system shall efficiently collect and carry away from the site, the water collected within the premises or the building complex or from the hillside above, fix suitable disposal as quickly as possible to water courses such as main drains or natural streams/streams without stagnation, avoiding any possibility of erosion, slope failure, damage to the building or other property in the vicinity.

(2) (a) proper slops not less than 1:60 shall be maintained all around a building for quick drainage of the entire plot as provided in Rules 90(1) (d) and 18.

The possibilities of erosion or ground failure through ingress and percolation of water into soft ground or through joints and fissures in the soil crust shall be prevented by suitable surface protection measures such as surface grouting, stone pitching, planting of small plants and grass, so as to protect and make the surface impervious in accordance with the provisions of the BIS Code, specially the minimum distance from provision required to be maintained for planting trees:

(b) the flow of water, particularly on the upper side of the building, shall be diverted away from the foundations through suitable lined or unlined drains

(c) drains for sullage/rain water must be constructed with round or half-round tiles embedded in concrete, or with U-shaped stone masonry set in lime mortar and plastered over the inner surface with Portland cement or with U-shaped stone concrete and the sectional area of every drain shall be subject to the approval of the Municipality / Nagar Panchayat.

(d) drains for surface water only may be constructed either of dry rubble masonry or of any other material approved by the Local Body and may be either rectangular or U-shaped in section. Such drains shall not be connected with any drain carrying sullage water or sewage;

(e) except with the written permission of the Local Body no covered drain shall be constructed and no existing open drain shall be covered in;

(f) no building shall be placed cover any drain;

(g) where a small drain is crossed by a private road, a removable,
R.C.C. slab cover or wooden or iron grating, if the Local Body so direct, must be laid over the drain, instead of covered culvert;

(h) drains must discharge into the nearest water channel or public drain, unless in any case the Local Body otherwise direct. The outfall of a drain into a water channel or public drain must be protected and guided in such manner as Local Body may direct. Where the drain of a private road joins the drain of a public road, the former drain must be so directed or so protected by strike boards as to minimize the risk of damage to the public drain or road.

Filters may also be provided where necessary;

(i) every building must be constructed so as not to project over, or admit of water from the roof falling upon or damaging, any open space, road or passage it abuts, whether public or private;

(j) every building shall have rain water gutters and pipes connected to a drain, along the periphery of a building;

(k) a masonry drain must be placed round the periphery of every building or block of buildings, sufficient in section and slope to the satisfaction of the Municipality / Nagar Panchayat for the effectual of the building and placed as to admit of the drainage being led into some drain at the time existing or projected;

(l) the surrounding round adjacent to the building must be sloped from all sides towards the perimeter drain and an impervious apron, not less than 0.75 m. wide shall be provided all around the building to prevent the entry of water into the foundations.

3. (a) Septic tank and soak pits shall also be so located so as to be easily accessible from the means of access to the plot.

(b) Soak pits shall be constructed on the side of buildings as far as possible, at right angles to the slope of the land and as far as possible from the building foundations. There shall be a minimum clearance of 2.1 metres between the foundation and the soak pit to minimize the chances of dampness and slope failures due to seepage from the soak pit.

(4)(a) A private bridge must be constructed as and where necessary to the
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

satisfaction of the Municipality/Nagar Panchayat so as to leave sufficient waterway to pass the maximum discharge of the channel spanned by the bridge.

(b) The invert of the channel under a private bridge must, as far as practicable, be laid to the same slope as that of the channel.

(c) When a pocket for the deposit of debris is cut in the hillside above a private bridge, it must be lined with masonry walls unless, if constructed on solid rock.

100. Protective work in hills.

(1) The cutting of slopes in the creation of steps and terraces for development work shall be carried out while ensuring the stability of excavations to provide for the safety of the buildings located and constructed thereon in accordance with the provisions in the BIS Codes.

(2) Local ground conditions shall be taken into account in the determination of the appropriate precautionary work and protection walls such as revetments, retaining walls, toe walls and breast walls as well as the specifications of the relevant codes of practice of the Bureau of Indian Standards including :-

IS 14243 - par. I & II: Selection and development of site for building in hill areas guidelines.

(3) The maximum height of cutting for development work as per soil strata shall be as given below:

<table>
<thead>
<tr>
<th>Soil Condition</th>
<th>Maximum Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>Loose soil or boulders with soil matrix</td>
<td>4.0 m</td>
</tr>
<tr>
<td>Compact soil or boulders with soil matrix overlaying loose, soft, fractured of firm hard rock strata which remains vertical in 4 m high cutting when dry</td>
<td>6.0 m</td>
</tr>
<tr>
<td>Hard stable rock with or without compact soil or boulder with soil matrix up to 2 m thick</td>
<td>8.0 m</td>
</tr>
</tbody>
</table>

Cutting of slopes over a height of 6.0 metres shall not be ordinarily permitted, excepting with the special approval of the Local Body.

(4)(i) The foundation of every protection wall must be taken down to original and
firm soil or rock, have a bed line cut at right angles with the face of the wall and a slope of 3:1 towards the hillside;

(ii)(a) where a protection wall does not exceed 6.0 metres in height and is not surcharged, the mean of thickness of the revetment of wall above the footings shall not be less than one-third of the vertical height of the revetment of wall, measured from the top of the footings,

(b) where a protection wall does not exceed 6.0 metres in height and is surcharged, the height assumed, for the determination of mean thickness of the revetment or wall above the footings, shall be one and a half times the actual vertical height:

provided that the width at the top shall in no case be less than 0.5 metres and shall not in any case exceed 1.0 metre,

(c) no structure shall be allowed to be raised from the top of the retaining / protective walls.

(iii)(a) a protective wall may be of dry rubble masonry, or cement masonry as per the directions of the Local Body.

(b) dry stone masonry protection walls shall include cement masonry bands, in 1:4 cement sand mortar 0.4 to 0.6 metre thick, at top and bottom and vertically at 3.0 to 5.0 metres spacing.

(c) no stone used shall be of greater height than its length or breath, all stones used must be laid on their natural beds, and must be arranged so as to break joint as far as may be possible,

(d) every protection wall must be built up solid to full section and sprays or crips shall not be used for filling the courses unless their use is unavoidable;

(iv) one though bonding stone or line of bonding stones must be inserted at intervals at 1.50 metres in each course, and at points intermediate between the corresponding bonding stones of the course show:

any of the bonding stones, which do not extend right through the wall, must overlap each other for one-third of their length.

(v)(a) special investigations and analysis shall be carried out to determine the
details of protection works in the case of R.C.C. retaining walls or protection walls on steep cut slopes greater than 6.0 metres in height, or in case of fine soils like silt, clay or shales,

(b) in all such cases, detailed designs must be submitted to the Local Body and the sections must be such as the Local Body may approve,

(c) protection walls of height more than 6.00 metres and successive retaining walls, shall only be permitted when there is hard stable rock behind and below the toe of the said wall, as permissible under relevant BIS codes of practice;

(vi) the height of cutting for any step of a stepped building shall not be more than 4 m and successive protection walls shall only be permitted when there is hard stable rock behind and below the toe of every such wall;

(vii) (a) weep-holes shall be provided in breast walls and retaining walls equipped with graded filter for proper drainage at intervals of 1.2 metres horizontally and 1.2 metres vertically, in staggered manner and beginning from 0.20 metre above ground level.

(b) water along the base of a breast wall and retaining wall shall be drained out by means of a suitable lined drain forming an integral part of the drainage system as specified in Rule

(viii) when, a slope is determined to be vulnerable to a debris slide in pursuance of any requisition or direction made or given by the Local Body, the angle of a slope shall be reduced to an angle of not more than 30° to the horizontal plane through trimming or cutting to make the slopes stable along with minor protection both for soil and building work.

Any barren surfaces above a cut slope shall be planted with selected varieties of light but deep rooted bushes, shrubs and grass to check soil erosion and improve the stability of the slope, in pursuance of any requisition or direction made or given by the Local Body.

101. Special Conditions.-

(1)(a). Additions to existing buildings shall only be permitted in the case of
structurally sound structures with a record of the complete details pertaining to the soil stability materials and system of construction.

(b) the total floor area, height and ground coverage after addition to an existing building shall not exceed the provisions of maximum permissible floor area, height and open space as per the criteria specified in this rule and other relevant rules, while the additions to an existing building shall further conform to the provisions for front, rear and side setback as specified in these rules.

(2) In the case of multiple buildings in a plot, open space shall be set aside as specified in for the purpose of public and community activity, in addition to the provisions for open space and for providing the means of access as specified in this rule.

(3) Every building erected or re-erected, must have such structural and architectural features as to prevent the building being in the opinion of the Local Body unsightly or unsuitable to its surroundings.

Furthermore, if the roof or walls of any building is, in the opinion of Local Body is in an unsightly condition they may, by written order direct the owner to repair, paint or colour-wash such part of the building as they may direct within the period specified in the order.

(4) The foundations of all buildings, parts must rest on solid ground or rock and have width and depth suitably designed, according to the distribution of the soil and hard rock strata in different parts of the foundation, and have dimensions worked out as per the permissible safe bearing capacity and other consideration in accordance with relevant Codes of practice of BIS. The depth below the ground level shall not be less than 2.00 metres in the case of R.C.C. column footings and 1:2 metres in the case of all foundations.

(5) Every building or part thereof shall have continuous foundation walls, extending below ground level as specified. All openings in such walls or in floors, walls, windows and drains and all junctions between building parts shall be tightly closed or effectively secured with pest proof screening materials as approved by the Local Body.
(6) The party-walls of a masonry or framed building or the end wall of a Ferro-concrete building must be built of stone or brick bedded in lime or cement mortar for their full height and if the Local Body so direct, must be carried up of a thickness of not less than 0.25 metre, above the roof, flat or gutter to such a height as will give a distance of at least 0.5 metres measured at right angles to the slope of the roof above the highest part of the roof flat or gutter.

(7)(a) Individual columns of all R.C.C. framed building, in the case of stepped foundations, shall be interconnected in 2(two) directions, generally at right angles, by R.C.C. beams at the footing level, designed in accordance with BIS Codes of practice;

(b) individual columns of all R.C.C. framed buildings as well as all external and internal walls of a load bearing structure, shall be interconnected in 2(two) directions generally at right angles, by R.C.C. beams at plinth level, adequately designed in accordance with BIS Codes of practice;

(c) there shall be adequately designed R.C.C. lintel bands in all external and internal brick and stone masonry walls at vertical intervals not more than 2.9 metre. These shall be continuous and connected to each other at the same level in the case of all load bearing walls and tied to the columns in case of R.C.C. framed structure.

(8) No building shall be altered so as to reduce the number, width or location of exist to less than what is required under the criteria specified in this rules.

(9) If any car parking space is required to be provided under the criteria specified in this rules and no such car parking space can be provided in such existing building, the floor area allowable under the provisions of these rules shall be reduced by the area required for such car parking spaces which cannot be provided for in the said building.

(10) No building shall be erected or re-erected in any locality if the Local Body at a meeting, records in writing that the proposed construction, either by reason of the nature of its construction and location or by reason of the uses to which it is intended to be put, is likely to affect in any substantial degree prejudicially any existing building, in the locality by reducing its market value or
by diminishing any advantage it enjoys on account of its situation or otherwise.

(11) The Municipality /Nagar Panchayat may decide the widths of buffer zone upslope and downslope of National Highways and State Highways where no new construction or addition/alteration to any existing structures or change of use will be allowed.

(12) The minimum widths for corridors within the building shall be as follows:

<table>
<thead>
<tr>
<th>Type of Building</th>
<th>Minimum Width</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential tenement (internal)</td>
<td>0.9 metres</td>
</tr>
<tr>
<td>Mercantile, Business and Assembly buildings</td>

</tr>
<tr>
<td>(shops on one side only)</td>
<td>3.0 metres</td>
</tr>
<tr>
<td>The width of all other corridors and those connecting vertical exist to individual units, shall not be less than the width of the corresponding staircases as specified in the rules.</td>
<td></td>
</tr>
</tbody>
</table>
PART XI
Heritage Building

§ 182. Preservation and conservation of Heritage Buildings.-

(1) Every owner or occupier of any heritage building declared as such by the Municipality/Nagar panchayat shall maintain, preserve and conserve it and shall not change its use in contravention of the provisions of these rules or the regulations made there under for its maintenance, preservation or conservation.

Explanation I.- The word "maintain", with its grammatical variations and cognate expressions, shall include fencing, covering, repairing, restoring or cleansing or doing of any act which may be necessary for the purpose of preserving or conserving, or securing convenient access to, a heritage building.

Explanation II.- "Owner" shall, notwithstanding anything contained elsewhere in the Act include, for the purposes of this chapter-

(a) a joint owner of a heritage building vested with the power of management thereof on behalf of himself and any other joint owner, or successor in-title of any such joint owner, or

(b) a manager or trustee, vested with the power of management of a heritage building or successor-in-office of such manager or trustee.

(2) Where the Municipality/Nagar Panchayat on the recommendation of the Heritage Conservation Committee and also the Chairman of the Municipality is of the opinion that any building in the Municipality/Nagar Panchayat should be preserved and conserved for historical architectural, environmental, cultural and ecological purpose, it may declare such building as a heritage building;

provided that during the period when any proposal for declaring any building as a heritage building under consideration of the Heritage Conservation Committee or the Chairman or the Municipality/Nagar Panchayat, no owner of such building or no lessee or sub-lessee to whom such building has been leased out, shall transfer such building by way of sale, lease or mortgage without prior approval of the Chairman of the Municipality/Nagar Panchayat.

(3) The Chairman of the Municipality/Nagar Panchayat shall constitute a Committee to be called the Heritage Conservation Committee with the Chairman of the Municipality/Nagar Panchayat as its Chairman and the In-Charge of Public Works Section as its Convener.

(4) The committee shall have, in addition to the Chairman and the convener, seven other members as follows:-
a) one shall be a nominee of the District Magistrate of the District;
b) one shall be a nominee of the Director of the Department of Archaeology, Govt. of Tripura/Govt. of India;
(c) one shall be an eminent Architect;
(d) one shall be an Artist;
(e) one shall be an Environmentalist;
(f) one shall be a Historian;
(g) one shall be the concerned Executive Engineer of the Municipal/Urban engineering Directorate/Cell/Section.

(5) The Committee may co-opt any person to be nominated by the concerned department of the State Government while dealing with any land or building under the management of the said department.

(6) The Committee shall, in accordance with the provisions of the Act and the rules and the regulations made there under scrutinize every application or proposal for declaration of a building as a heritage building, and recommend to and also advise the Chairman in respect of preservation and conservation of such building.

(7) The Committee shall meet as such periodical interval as may be determined by the Chairman.

(8) The Chairman shall, in case of emergency take such measures as may be necessary for the preservation and conservation of a heritage building provided that such measures shall be required to be approved by the Heritage Conservation Committee at its meeting.

(9) The Heritage Conservation Committee shall have the power to function independent of the Local Bodies for the purpose of preservation, conservation and maintenance of heritage building in so far such power does not offend any other provision of the Act or the rules made there under relating to construction or use of building:

provided that for erection or re-erection in a heritage building and part thereof or for restoration of any heritage building to its old shape, design or beauty in the case of unlawful demolition, or for making any change of internal and external wall, structural pattern, floor, roof, interior or exterior architectural floor, facade or skyline or for any other change, of a heritage building the provisions of the Act and the rules made there under shall apply mutatis mutandis.

(10) Subject to the other provisions of the Act the Chairman, may acquire.
purchased or taken on lease any heritage building for the purpose of preservation and conservation thereof;

provided that in the case of heritage building declared as such for the purpose of preservation and conservation as required under the Tripura Town and Country Planning Act, 1975, the approval of the concerned department of the State Government shall be taken.

(11) When the owner of any heritage building is not willing to preserve or conserve any heritage building, the Chairman may for the purpose of acquisition of such heritage building by agreement and on the recommendation of the Heritage Conservation Committee and with the approval of the Local Body allow the transfer of right of development of such heritage building, which shall be heritable and transferable, to the owner of such heritage building in such manner, and subject to such conditions, as may be prescribed.

Explanation I. - "Development" shall have the same meaning as in the Tripura Town and Country Planning Act, 1975.

Explanation II. - "Right of development of a heritage building" shall mean the right of development, in the prescribed manner, of such potential as may be available in respect of such heritage building on a plot of land different from the land and building comprising the heritage building but in the same ward of the Municipality/Nagar Panchayat.

(12) Subject to such rules or regulations as may be made under these rules and any Act every person shall have the right to access to any heritage building acquired by the Municipality/Nagar Panchayat.

(13) The municipality/Nagar Panchayat shall have the right to allow the transfer of right of development to the lessee of a heritage building where the unexpired period of the term of lease is for 90 years, and to take the heritage building on sub-lease by agreement, if there is provisions for such sub-lease in the deed executed between the owner and the lessee, provided that the question of payment of premium or rent in such case to the owner shall not, notwithstanding any agreement in this behalf arise, and if the owner as confirming party to the agreement waives the right to receive any further payment of such premium or rent.

(14) If the Municipality/Nagar Panchayat considers that it is necessary to acquire any building declared as a heritage building for the purpose of preservation and conservation as required under sub-clause (ii) of clause (a) of sub-section (4) of section 31 of the Tripura Town and Country Planning Act,
1975, by agreement or under the Land Acquisition Act 1984, permission of the concerned Department of the State Government shall be taken before such acquisition.

(15) If the owner of a heritage building enters into an agreement with the Municipality/Magar Panchayat to maintain, preserve and conserve such heritage building property at his own expenses the Municipality/Magar Panchayat may, in such case, exempt wholly or partly the owner of such heritage building from payment of rates or fees for supply of water or any other charge in respect of such heritage building.

(16)(i) The Chairman may pending acquisition of a heritage building by the Municipality/Magar Panchayat under these rules or any Act and with the approval of the Local Body propose to the owner of such heritage building to enter into an agreement with the Municipality/Magar Panchayat for a specified period for the maintenance of such heritage building;

(ii) the agreement as aforesaid may provide for all or any of the following matters:-

(a) maintenance of the heritage building by the owner or by any other person willing to maintain the said heritage building,
(b) custody of the heritage building and the duties of the person who may be employed to watch it;
(c) the restriction on the owners right-

(1) to use the heritage building for any other purpose detrimental to its conservation.
(2) to charge any fee for entry into, or inspection of, the heritage building, and
(3) to build on or near the site of the heritage building.

103. Saving:-

(1) All rules as to the use of building sites and execution of building works, made under the Tripura Municipal Act (herein after referred to as the former rules) and in force immediately before the coming into force of these rules, shall, with effect from the date of coming into force of these rules, cease to have effect.

(2) Notwithstanding such ceaser, every building plan sanctioned under the former rules and remaining valid on date immediately before the date of coming into force of these rules, shall continue to remain valid till the expiry of the, period of validity thereof.
104. **Huts/mud Walls**:  
In areas specially set apart in development plans and detailed Town Planning Schemes, or in any area approved by the Local Body/Authority, construction of huts may be allowed subject to the following conditions:-

- **a)** Application for permission to construct or re-construct or alter or add to a hut/mud wall shall be in the form set out vide these rules (form set out in the Appendix - "A").
- **b)** A Hut/Mud Wall have 1.5 metres wide open space on all sides.
- **c)** A Hut/Mud Wall shall have its floor area at least 20 cm. above the surrounding grounds.
- **d)** A Hut/Mud wall shall have a clear internal area of 4 square metres and minimum width in any direction shall not be less than 2 mtrs.
- **e)** No Hut/Mud wall shall be of more than one storey. The minimum height at the caves shall not be less than 2 metres.
- **f)** Every Hut/Mud wall shall invariably be provided with ventilating openings of not less than 10 per cent of the floor area.
- **g)** Every Hut/Mud wall shall be provided with adequate sanitary and drainage arrangements. Latrines shall be of water flush sanitary system.
- **h)** Application Fee for seeking permission to construct a Hut/Mud Wall, the rate will be as per the fixed by the concerned Local Body.

105. **Dwelling with floor area less than prescribed measurement (laid down in these rules):**

In the case of dwelling units with floor area less than the prescribed measurement as laid down in these rules (one hundred square metres) put up by public agency or by individual owner for dwellings for economically weaker sections of the society of low income group housing, permission may be given subject to the modifications specified below:-

- **a)** Plot requirements - The area of the plot shall not be less than 0.2 acre unless otherwise decided by the Authority/Local Body, subject to a minimum road frontage of 3.0 metre.
(b) **Open space requirements**

1. The front open space of every building in this category shall be 0.2 metres.
2. The minimum distance between the centre line of a street and any building in this category shall be 4.0 metres.
3. Such buildings may abut one side of the property provided the side open on the other side is 0.8 metres.
4. The rear open space for such dwelling shall be 1.7 metres. The construction of ancillary structure in the rear yard such as well, latrine, garbage pit, fuel shed etc. shall be limited to 2 sq. metres in extent of 30% of the area of the rear open space whichever is less, provided the space in between mud wall building and the apartment structure shall be 0.8 metres.

(c) **Access to plots:** The width of access street shall not be less than 2.5 metres.

---

**For physically Handicapped persons**

106. **Minimum access provisions required in various types of buildings.**

</tbody>
</table>

107. **Facilities to be provided for physically handicapped persons.**

These provisions are applicable to all buildings and facilities used by the public. It does not apply to private and public residences.

(i) **Site development:**

Level of the roads, access paths and parking areas shall be described in the plan along with specification of the materials while
submitting a plan and design of a building and facilities used by the public i.e. parks, rest-houses, stadium etc.

(ii) Access Path/Walk Way:

Access Path from plot entry and surface parking to building entrance shall be minimum of 1800 mm wide having even surface without any steps. Slope, if any, shall not have gradient greater than 5%. Selection of floor material shall be made suitably to attract or to guide visually impaired persons (limited to colored floor material whose colour and brightness is conspicuously different from that of its surrounding floor material or the material that emit different sound to guide visually impaired persons hereinafter refused to as “guiding floor material”). Finishes shall have a non-slip surf ace with a texture traversable by a wheel chair. Curbs wherever provided should blend to a common level.

(iii) Parking:

For parking of vehicles of handicapped people the following provisions shall be made:

(a) Surface parking for 2 (two) car spaces shall be provided near entrance for the physically handicapped persons with maximum travel distance of 30.0 metre for building entrance.

(b) The width of parking bay shall be minimum 3.6 metres.

(c) The information stating that the, space is reserved for wheel chair users shall be conspicuously displayed.

(d) Guiding floor materials shall be provided or device that guides visually impaired persons with audible signals or other device, which serves the same purpose, shall be provided.

(iv)(a) The specified facilities for the buildings for physically handicapped persons shall be as follows:

A) Approach to plinth level.

B) Corridor connecting, the entrance/exit for the handicapped.

C) Stair-ways.

D) Lift.

E) Toilet.

F) Drinking Water.

(b) 1. Approach to plinth level:

Every building should have at least one entrance accessible to the handicapped and shall be indicated by proper signage. This entrance shall be approached through a ramp together with the stepped entry.

2. Ramp Approach:

Ramp shall be finished with non-slip material to enter the building. Minimum width of ramp shall be 1800 mm with maximum gradient 1:12. Length of ramp shall not exceed 9.0 metre having 800 mm high hand rail
on both sides extending 300 mm. beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50 mm.

3. Stepped Approach:
For stepped approach size of tread shall not be less than 300 mm and maximum riser shall be 150mm. provision of 800 mm high hand rail on both sides of the stepped approach similar to the ramped approach.

4. Exit/Entrance Door:
Minimum clear opening of the entrance door shall be 900 mm and it shall not be provided with a step that obstructs the passage of a wheelchair user. Threshold shall not be raised more than 12 mm.

5. Entrance Landing:
Entrance landing shall be provided adjacent to ramp with the minimum dimension 1800 mm x 2000 mm. The entrance landing that adjoin the top end of a slope shall be provided with floor materials to attract the attention of visually impaired persons (limited to colored floor material whose color and brightness is conspicuously different from that of the surrounding floor material or the material that emit different sound) to guide visually impaired persons hereinafter referred to as “guiding floor material". Finishes shall have a non slip surface with a texture traversable by a wheelchair. Curb wherever provided should blend to a common level.

6. Corridor connecting the entrance/exit for the handicapped:
The corridor connecting the entrance/exit for handicapped leading directly outdoors a place where information connecting the overall use of the specified building can be provided to visually impaired persons either by a person or by signs, shall be provided as follows:
(a) “Guiding floor materials" shall be provided or devices that emit sound to guide visually impaired persons.
(b) The minimum width shall be 1500 mm.
(c) In case there is a difference of level slope ways shall be provided with a slope of 1:12.
(d) Hand rails shall be provided for ramps/slope ways.

7. Stair ways:
one of the stair-ways near the entrance/exit for the handicapped shall have the following provisions:
(a) The minimum width shall be 1350 mm.
(b) Height of the riser shall not be more than 150 mm and width of the tread 300 mm. The steps shall not have abrupt (square) nosings.
(c) Maximum number of risers on a flight shall be limited to 12.
(d) Hand rails shall be provided on both sides and shall extend 300 mm. On the top and bottom of each flight of steps.

8. Lifts:

Wherever lift is required at least one lift shall be made for the wheel chair users with the following case dimensions of lift recommended for passenger lift of 13 persons capacity by Bureau of Indian Standards.

- Clear internal depth: 1100 mm.
- Clear internal width: 2000 mm.
- Entrance door width: 900 mm.

(a) A hand rail not less than 600 mm long at 1000 in above floor level shall be fixed adjacent to the control panel.

(b) The lift lobby shall be of an inside measurement of 1800 mm x 1830 mm or more.

(c) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 metre/Sec.

(d) The interior of the cage shall be provided with a device that audibly indicates the floor the cage has reached and indicated that the door of the cage for entrance/exit is either open or closed.

9. Toilets:

One special W.C. in a set of toilet shall be provided for the use of handicapped with essential provision of wash basin near the entrance for the handicapped.

(a) The minimum size shall be 1500 mm x 1750 mm.

(b) Minimum clear opening of the door shall be 900 mm and the door shall swing out.

(c) Suitable arrangement of vertical/horizontal handrail with 50 mm. clearance from wall shall be made in the toilet.

(d) The W.C. seat shall be 500 mm from the floor.

10. Drinking Water:

Suitable provision of drinking water shall be made for the handicapped near the special toilet provided for them.

11. Designing for Children:

In the buildings meant for the predominant use of the children, it will be necessary to suitably alter the height of the handrail and other fittings and fixtures etc.
12. Use of electric power points:
   All electrical power points should be fixed at a height accessible for wheel chair users. No protruding objects should be present in the circulation area.

108. Installation of Solar Assisted Water Heating System in Govt. functional Buildings,

Installation of Solar water Heating System:
(a) New Building:
   Clearance of plan for the construction of new buildings shall only be given if they have a provision in the building design itself for insulated pipelines from the rooftop in the building to various distribution points where hot water is required. The buildings must have a provision for continuous water supply to the solar water heating system. The building should also have open space on the rooftop, which receives direct sunlight. The load bearing capacity of the roof should at least be 50 Kg. per sqm. All new buildings must complete installation of Solar Water Heating Systems before obtaining necessary license to continuance their business.
(b) Existing Buildings:
   Installation of Solar Assisted Water Heating Systems in the existing building is mandatory at the time of change of use provided there is a system or installation for supplying hot water. The Local Body will strictly observe it while changing the pattern of use.
(c) Capacity:
   The capacity of Solar Water Heating System to be installed on the building of different categories shall be decided in consultation with the Local Bodies of the respective Nagar Panchayat/Municipality. The minimum capacity shall not be less than 25 litres per day for each bathroom and kitchen subject to the condition that maximum of 50% of the total roof area is provided with the system.
(d) Specification :
   Installation of Solar Assisted Water Heating System shall conform to BIS (Bureau of Indian Standards) specification IS 12933. The Solar collectors used in the system shall have the BIS certification mark.
Tripura Gazette, Extraordinary Issue, December 15, 2004 A. D.

→ (e) Auxiliary System:

Wherever hot water requirement is continuous auxiliary heating arrangement either with electric elements or oil of adequate capacity can be provided.

109. **Categories of buildings/public utility places where Solar Assisted Water Heating Systems are to be installed:**

The following categories of buildings in which there is a system of installation for supplying hot water shall be built unless the system or the installation is also having an auxiliary solar assisted water heating system:

(a) Hospitals & Nursing Homes;
(b) Hotels, Lodges and Guest Houses;
(c) Hostels of Schools, Colleges, Training Centres
(d) Barracks of armed forces, paramilitary forces and polices;
(e) Individual residential building having more than 150 sq. metre. plinth area;
(f) Functional Buildings of Railway stations and Air Ports - like waiting rooms, retiring rooms, rest rooms, inspection bungalows and catering units;
(g) Community centres, Banquet Halls, Barat Ghars, Kalyan mandaps and buildings for similar use.

110. **Provision for rainwater harvesting and wastewater recycling:**

(a) Water harvesting through storing of rain water runoff is mandatory in all new buildings having plinth area more than 300 sq. metre for all types of uses and in group housing of any size. The plan for the above buildings submitted to the local bodies shall indicate the system of storm water drainage along with points of collection of rain water in surface reservoirs or in recharge wells. A system of dual piping must be installed in the group housing buildings in order to utilize part of untreated water supply. A separate overhead water tank for feeding WCs, urinals, water coolers would serve one piping system and garden taps. The other piping system would supply (municipal supply) treated water to the washbasins, bath taps and kitchen taps.

(b) All non-residential buildings having a discharge of 10,000 litters per day shall incorporate wastewater re-cycling system. Recycled water should be used for horticultural purpose.
111. **Provision for insurance of building**

(a) All the residential buildings having plinth area more than 300 Sq. meters or above 3 storeyed, shall be insured for any natural calamities/fire hazard with an insurance company registered under the Insurance Company Act prevailing in India.

(b) All the buildings other than residential having 2 storeys and above shall be insured for any natural calamities/fire hazard with an insurance company registered under the Insurance Company Act prevailing in India.

(c) It is the owner's responsibility to insure the building as per norms and intimate the local body along with copy of insurance details.
Appendix—A

Form for application to erect or re-erect at Hut/Mud Wall.
(Ref. Rule No. 104)

To
The Chairman.

__________________________ Nagar Panchayat / Municipality.

Sir,

I intend to erect/re-erect/alter a hut/mud wall in Ward No. ______ Holding No. ______ of ____________________________ Road/ village in __________________________ Tahasil. I forward herewith the following particulars duly signed by me.

1. Diagrammatic sketch of proposed hut/mud wall (triplicate).
2. General description of work (in triplicate).
3. Proof of ownership of land, Regd. Deed parcha etc.
4. Copy of receipt for payment of application fee.

I hereby undertake to abide by the provisions of Tripura Building Rules, 2004 in all respect.

I request that the erection/re-erection/alteration may be approved and permission accorded to me to execute the work.

Application for permission to Construct or Reconstruct/ Addition or Alteration of Building

From __________________________ (Name in full block letters)

Address: __________________________

Purpose of construction: Residential / Commercial/ Industrial/ Public Building /Others (specify).

To

The Chairman,
__________ Municipality /Nagar Panchayat

Sir,

I / We hereby give you notice that I / We intend to construct or reconstruct a building or make alteration in or additions to premises No./ Holding No._________ in __________________________ Street ____________________ Ward / Circle ____________ and in accordance with provisions of building plan (Residential) Rules/Regulations ___________/ building plan (Commercial & Industrial) Rules/Regulation and the provisions of the Act, I forward herewith -

(a) Approved site plan of the land;

(b) A plan in triplicate showing elevation and sections of the proposed building together with a specification of the work;

(c) Statement of particulars (Annexure);

(d) Receipt for deposition of application fee specified in rule 14(9);
(e) Reports of soil test or test for stability of slope as per rule

(f) Detailed calculation of structural design as per provision in this rule.

I request that the plan may be approved and that permission may be accorded to execute the work.

*Please note that I am also enclosing herewith the documents as desired by you as per instruction.

Countersigned

Yours faithfully,

Architect/Licensed Building Planner/Structural Engineer,

Dated:

* I / We hereby declare that I/we are the owner/owners of the property to be built upon and the copy of registered deed of land or other documents in support of ownership/ownerships of land are submitted here with.

INSTRUCTIONS TO THE APPLICANT

1. The applicant must be owner of the land.
2. Before filling up the form please go through the provisions of the Building Rules.
3. The applicant is requested not to take up the building construction until and unless he is permitted to do so. If any such construction is undertaken without permission, it will be treated as clear violation of the Building Rules and matter will be proceeded with accordingly.
4. The building shall not be considered within the restricted distance of the electric wire running on any side of the side under the provisions of the Indian Electricity Rules.
5. The building plan must be prepared by the Architect / Licensed Building Planner and the list of approved Building Planners available in the office.
6. If any information or document is required under the Building Rules or is, in the opinion of the competent authority, incomplete, he may require further information or documents to be furnished.
7. If the Land Use controller, if any, refused to issue "No objection Certificate", in that case the competent authority will not accord any sanction of Building
Plan as per this rules.

8. In case of fees in respect of grant of permission to execute any work it would be determined as per Rule 25. The said fees to be paid in the form of Account Payee Demand Draft on any Schedule Bank of the area in favour of ______________ along with duly filled in application Form B and other enclosures.

9. Applicant shall submit the application Form B as the case may be (in duplicate) duly filled in, for permission to construct or re-construct masonry building and shall enclose the following documents with the application, otherwise it will be rejected:

   (a) An approved site plan.
   (b) A building plan in triplicate.
   (c) Filled up Form B as the case may be, in duplicate
   (d) Filled up Annexure of Form B (in duplicate).
   (e) Attested copy / certified copy of allotment of land and possession certificate of land.
   (f) Attested copy of current holding tax receipt in case of old building / new building for execution purpose.
   (g) Account payee Demand Draft of Rs. ______ as Fees for sanction of Building Plan.

FORM OF BUILDING PERMIT

From : The Chairman

Dated ________________________

Office Ref. No. nd date if any

Municipality / Nagar Panchayat

To __________________________

(Name and address of the applicant)

Subject : Issue of sanction / provisional sanction of erection/ re-erection/ addition or alteration of the building and issue of Building permit under rule 20(1).

Building Particulars : premises No. and Street ...........................................

................................................... Ward No. __________

Sir,

With reference to your application dated the .................... for the sanction / provisional sanction ............................. erection/ re-erection/ addition or alteration of the building on Plot No ............... street ............... Ward No ....................... this building permit to hereby granted subject to the following conditions, namely:

1. The Building permit is valid up to the ............... day of ......... ......... (month) ............... (year)

2. The Building permit No ....................... dated the ............... ............... is valid for occupancy of the use group (Residential/ commercial/ Public Building/ Other—specify)

3. The Building/ work, for which this Building permit is issued shall be completed within ............... ............... ............... ............... 

4. The construction will be undertaken as per sanctioned plan only and no deviation from the Building Rules, under Tripura Municipal Act, 1994 will be permitted. Any deviation done against the said rules is liable to be demolished.

5. One set of the plan and specifications submitted along with the notice duly countersigned is returned herewith.

Yours faithfully,

Chairman

(Signature and designation of the officer to whom power have been delegated)

Office No. ................
Office Stamp ................

FORM OF COMMUNICATION OF REUSAL OF SANCTION

From: The Chairman

----------------------------------
Municipality / Nagar Panchayat

To

.................................................................
(Name and address of the applicant)

Subject:: Communication of refusal of sanction under rule 20 (1) (b).

Building Particulars : Premises No. and Street ....................................
.................................................................
Ward No ...........................................................

Sir,

With reference to your application dated the ......................... for the sanction / provisional sanction for .................................. erection / re-erection / addition to / alteration of the building on plot ................................................................. (number, street address, Ward No.) the sanction / provisional sanction has been refused under rule 20 of the Building Rules, under Tripura Municipal Act, 1994.

The ground / grounds on which the sanction has been refused is / are as follows:

(1)
(2)
(3)
(4)

Yours faithfully,

Office No........................
Office Stamp ............
Dated the .............

Chairman
(Signature and designation of the officer to whom power have been delegated)
FORM E
(See Rule 28)
FORM OF NOTICE OF COMMENCEMENT

From: ........................................

 ........................................

 ........................................

(Name and address of the applicant) Dated: __________________________

Office Ref. No. and date if any: ........................................

To: The Chairman Municipality / Nagar Panchayat

Subject: Notice of commencement under rule 28 of Tripura Municipal Building

rules, 2004 under Tripura Municipal Act, 1994 as per building permit no.

---------- dated ----------.

Building particulars: Premises No. and Street: ........................................

Ward No: ........................................

Sir,

I/we hereby give notice that the erection / re-erection or addition or alteration of

the building on Plot No: ........................................, Street: ........................................

Ward No: ........................................ will be commenced on: ........................................

dated: ........................................ as per building permit no: .........................

generated by you, with the plans and specifications sanctioned.

Yours faithfully,

(Signature of the applicant)
FORM F
(See Rule 29(1))

FORM OF NOTICE OF COMPLETION OF WORK UP TO PLINTH LEVEL OR UP TO 1.0 METER ABOVE G.L. WHICHEVER IS HIGHER.

From: ..................................................

..................................................
(Name and address of the applicant) Dated ..........................
Office Ref. No. and date if any

To
The Chairman
..................................................
..................................................
Municipality / Nagar Panchayat

Subject: Notice of completion of structural work up to plinth level or up to 1.0 metre above G.L. whichever is higher under rule 29(1).

Building Particulars: Premises No. and Street ..................................
..................................................
..................................................
Ward No ..................................................

Sir,

I / we hereby inform you that structural construction up to the plinth level or up to 1.0 meter above G.L. whichever is higher on Plot No. ................................., Street ................................., Ward No ................................., for which Building permit has been issued to me vide letter No. ................................., dated ................................., has been completed in accordance with the sanctioned plan.

The work may be inspected in pursuance of the provision of the sub-rule(2) of rule 29 of the Tripura Building Rules, 2004 under Tripura Municipal Act, 1994.

Yours faithfully,

(Signature of the applicant)
BUILDING COMPLETION CERTIFICATE

From: ___________________________________________  Date: ..............

_________________________________________________________ Reference No......

(Owner's Name and address)
Submitted on:

To
The Chairman,
_____________________________ Municipality/Nagar Panchayat,

Sir,

I/We hereby certify that:

1. The building(s) has been constructed to the sanctioned Plan and structural design
   (one set of structural drawing as executed & certified by the Structural Engineer is
   enclosed) which incorporates the provision of structural safety as specified the
   Tripura Building Rules and in relevant prevailing Indian Standards/ Guidelines.

2. Construction has been done under our supervision/guidance and adheres to the
   drawings submitted and records of supervision have been maintained by us.

Yours faithfully,

(Signature of Architect)  (Signature of the Supervising Engineer)

(See rule 15 (n))

FORM OF INDEMNITY BOND

(To be submitted on non-judicial stamp paper of Rs. 10)

This Indemnity Bond is executed by Shri ........................................ and Shri ................................................................. Son- sons of Shri /late ........ 
................................................................................... resident of ........................................ owner of premises No....................................................... in (Name of the street and Nos.................... of ward).

WHEREAS I/ we am/are submitting to the Municipality/Nagar Panchayat (hereinafter referred to us the said Municipality/Nagar Panchayat) building plans with provision for deep foundations work, piling works, construction of basement and underground constructions.

AND WHEREAS I/ we am/are representing to the said Municipality/Nagar Panchayat that if sanction is granted for the construction of the aforesaid work, I/ we shall indemnity the said Municipality/Nagar Panchayat for any loss or damage at the time of execution of the said works or thereafter.

WHEREAS I/ we undertake that all precautionary measures shall be undertaken by me/us and no excavation shall be carried out beyond the boundaries of the plot. Any damage occurring during the execution of the work or due to excavation made at site to the municipal/public utility services or properties shall be made good by me/us;

WHEREAS I/ we further undertake and agree to indemnify the said Municipality/Nagar Panchayat to the full extent of any claim put up against the said Municipality/N.P. either by way of damage, compensation or pay any, other way in case the said Municipality/N.P. is required to pay any amount to any person or owner or owners of the adjoining properties;
WHEREAS I / we further undertake and agree to indemnify the said Municipality / Nagar Panchayat of all costs and expenses the said Municipality/N.P. may require to defend any action in this regard to any court of law;

NOW, THEREFORE, in consideration of the above matter, undertaking and indemnity given by the said owners, Municipality /Nagar Panchayat in this behalf, grant the sanction in the said basement to the said owners.

IN WITNESS: HEREOF, the owners above mentioned put their hands and seal to the said Indemnity Bond on this ..................... day of ..............

Witness:

(Executants)
LIST OF INDIAN STANDARDS / NBC SECTIONS RELATED TO STRUCTURAL SAFETY AND PRODUCTION OF BUILDINGS AGAINST NATURAL HAZARDS

a) For foundation

1) Part 6, Section 2 of the National Building Code of India
2) IS 12070 : 1987 Code of practice for design and construction of shallow foundation on rock
3) IS 13063 : 1991 Code of practice for structural safety of buildings on shallow foundation on rock

b) For General Structural Safety

1) The following sections of Part 6 of the National Building code of India
   Section 1 Loads
   Section 3 Wood
   Section 4 Masonry
   Section 5 Concrete
   Section 6 Steel
   Section 7 Prefabrication and system Buildings

c) For Earthquake protection

1. IS: 1893-1984 "Criteria for Earthquake Resistant Design of Structures (Fourth Revision)"
2. IS: 13920-1993 "Ductile Detailing of Reinforced Structures subjected to Seismic Forces -- Code of Practice"
3. IS: 4326-1993 "Earthquake Resistant Design and Construction of Buildings -- Code of Practice (Section Revision)"

d) For Cyclone / wind storm protection

1. IS 875 (3)-1987 "Code of Practice for Design Loads (other than Earthquake) for Buildings and Structures, Part 3 Wind Loads"

e) Landslides

   Section of type of wall
   Design of retaining / breast walls
   Construction of dry stone walls
   Part 2 Macro-zonation

The latest versions of standards and amendments if any to the above and those listed in the part and sections of the National Building Code referred above shall be used when designing, approving building plans and carrying out construction.
PROTECTION AGAINST HAZARDS

PROTECTION OF AREAS FROM EARTHQUAKES

i. In those areas where there are no dangers of soil liquefaction or settlements or landslides, all building structures and infrastructures should be designed using the relevant Indian Standards as in the Building Regulations and the National Building Code.

ii. Soils subjected to liquefaction potential under earthquake shaking can be improved by compaction to desired relative densities, so as to prevent the possibility of liquefaction.

iii. Buildings and structures could be founded on deep bearing piles going to non-liquefaction dense layers.

iv. Steep slopes can be made more stable by terracing and construction of retaining walls and breast walls, and by ensuring good drainage of water so that the saturation of the hill-slope is avoided.

v. Any other appropriate engineering intervention to save the building structures or infrastructure from the fury of the earthquake.

Note: The protective action given under (ii) to (v) will usually involve large amount of costs and should only be considered in the case of large and costly structures. For ordinary buildings the cost of improvement of the site will usually be uneconomical, hence bad sites should be excluded by Land Use Zoning.

PROTECTION FROM CYCLONIC WIND DAMAGE

i. Buildings, structures and infrastructures in the cyclone prone areas should be designed according to the Indian Standards and Guidelines as provided in the
Regulations and the National Building Code.

ii. Light utility structures used for electrical transmission and distribution, and towers for communications, chimney stakes of industrial structures require special design considerations against the cyclonic wind pressures, suction and uplifts.

iii. In case the buildings, structures and infrastructures are founded on marine clay deposits it will be advisable to adopt either under-reamed or long piles which should penetrate the marine clay layer and rest on dense sand stratum, or individual column footing with a reinforced concrete beam located at the level of the ground, or a continuous reinforced concrete strip footing, using a very low bearing pressure not exceeding ...........

iv. Wherever, the top soil could become slushy due to flooding, the top layer of 30 cm depth of soil should not be considered for providing lateral stability.

v. In storm surge prone areas, it will be preferable to construct the community structures, like schools, cyclone shelters, etc. by raising the level of the ground protected by provision of retaining walls at sufficient distance away from the building, taken to such depth that no erosion takes place due to receding storm surge. Alternatively, construct the community structures on stilts with no masonry or bracing up to the probable maximum surge level.

**PROTECTION OF AREAS FROM FLOODS**

This may require one or more of the following actions.

i. Construction of embankments against the water spills from the source of flooding rivers, large drain etc.

ii. Construction of high enough embankments/bund around the planning area.
iii. Raising the planning area above the high flood level.

iv. Construction/improvement of drainage paths to effectively drain the water from the planning area.

v. Construction of buildings and structures on deep foundations going below the depth of scour or on stilts with deep enough foundations under water.

vi. Flood proofing works such as the following:
   Providing Quick Drainage facility, consisting of
   - Revitalization of secondary and primary drainage channels after establishing the drainage blockage points;
   - Provision of additional waterways;
   - Clearing of clogging cross drainage works;
   Providing Human and Animal Shelters for population living within embankments in the form of raised platform or use of available high ground.

vii. Anti-erosion actions in affected areas.

vii. Any other suitable measure.

Note: Similar protection methods could be used against flooding caused in cyclone prone areas by high intensity rains or by the storm surge.

The concept of land zoning should be kept in mind for areas where protection works are taken up to decide inter-se priority for location of structures considering possibility of failure of protection works during extreme disaster events.
ADDITIONAL PROVISIONS IN BUILDING REGULATIONS/BYE LAWS
FOR STRUCTURAL SAFETY IN NATURAL HAZARDS PRONE AREAS

STRUCTURAL DESIGN

Generally, the structural design of foundations, elements of masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to the provisions of part VI Structural Design Section - 1 Loads, Section - 2 Foundation, Section - 3 Wood, Section - 4 Masonry, Section - 5 Concrete & Section - 6 Steel of National Building Code of India (NBC), taking into consideration the Indian Standards as given below:

For General Structural Safety

3. IS: 801-1975 "Code of Practice for Use of Formal Light Gauge Steel Structural Members in General Building Construction
4. IS: 875 (Part 2): 1987 Design loads (other than earthquake) for buildings and structures Part 2 Imposed Loads
5. IS: 375 (Part 3): 1987 Design loads (other than earthquake) for buildings and structures Part 3 Wind Loads
6. IS: 875 (Part 4): 1987 Design loads (other than earthquake) for buildings and structures Part 4 Snow Loads
7. IS: 875 (Part 5): 1987 Design loads (other than earthquake) for buildings and structures Part 5 special loads and load combination
11. IS: 2911 (Part 1): Section 1 1979 "Code of Practice for Design and Construction of Pile Foundation Section 1
   Part 1: Section 2 Based Cast-in-situ Piles
   Part 1: Section 3 Driven Precast Concrete Piles
   Part 1: Section 4 Based precast Concrete Piles
   Part 2: Timber Piles
   Part 3: Under Reamed Piles
   Part 4: Load Test on Piles

For Cyclone/Wind Storm Protection
12. IS: 875 (3)-1987 "Code of Practice for Design Loads (other than Earthquake) for Buildings and Structures, Part 3 Wind Loads"
13. Guidelines (Based on IS 875 (3)-1987) for improving the Cyclonic Resistance of Low rise houses and other buildings

NOTIFICATION

In exercise of the powers conferred by section 274 read with section 118 of the Tripura Municipal Act, 1994, the State Government hereby makes the following rules, to amend the Tripura Building Rules, 2004, namely:

1. (1) These rules may be called the Tripura Building (1st Amendment) Rules, 2011.
   (2) They shall come into force on the date of their publication in the Official Gazette.

2. Sub-rule (2) (a) (i) of rule 46 of the Principal Rules shall be substituted with the following:
   "(2) (a) (i) In the case of a residential building with other occupancies, if any, on less than 10% of the total covered area of building, the width of such street or passage shall not be less than 1.8 metres at any part."

3. Sub-rule (2) (b) of rule 46 of the Principal Rules shall be deleted.

4. Sub-rule (1) (a) of rule 47 of the Principal Rules shall be substituted with the following:
   "(1) (a) The maximum permissible ground coverage for building, when a plot contains a single building, shall depend on the plot size and the use of the building as given in the table below:
TABLE
Maximum Permissible Ground Coverage

<table>
<thead>
<tr>
<th>Type of building</th>
<th>Maximum Permissible Ground Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Residential and Educational;</td>
<td></td>
</tr>
<tr>
<td>a) Plot size up to 200 Sq. metres :</td>
<td></td>
</tr>
<tr>
<td>(i) Residential.</td>
<td>70%</td>
</tr>
<tr>
<td>(ii) Educational.</td>
<td>60%</td>
</tr>
<tr>
<td>b) Plot size above 500 Sq. metres :</td>
<td></td>
</tr>
<tr>
<td>(i) Residential.</td>
<td>50% or 130 Sq. metres whichever is more.</td>
</tr>
<tr>
<td>(ii) Educational.</td>
<td>50% or 130 Sq. metres whichever is more.</td>
</tr>
<tr>
<td>2. Building of other use including mixed use:</td>
<td></td>
</tr>
<tr>
<td>a) Plot size up to 200 Sq. metres</td>
<td>40%</td>
</tr>
<tr>
<td>b) Plot size above 500 Sq. metres</td>
<td>50%</td>
</tr>
</tbody>
</table>

5. Sub-rule (3) of rule 48 of the Principal Rules shall be substituted with the following:

"(3) The maximum permissible height of buildings on a plot shall be as given in the table below:

TABLE

<table>
<thead>
<tr>
<th>Width of means of access (in metres)</th>
<th>Maximum permissible height (in metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Road width between 1.5 metres and 2.4 metres.</td>
<td>Upto 8 metres (G+1)</td>
</tr>
<tr>
<td>(b) Road width above 2.4 metres and up to 3 metres.</td>
<td>Upto 11 metres (G+2)</td>
</tr>
<tr>
<td>(c) Above 3 metres and up to 15 metres.</td>
<td>Upto 14 metres (G+3)</td>
</tr>
<tr>
<td>(d) Above 15.0 metres and up to 16.0 metres.</td>
<td>14.0 metres.</td>
</tr>
<tr>
<td>(e) Above 16.0 metres</td>
<td>Tall buildings (i.e., above 14.0 metres)</td>
</tr>
</tbody>
</table>

Note: This table shall be read with rule 46. For height of buildings exceeding 14.0 metres, rule 51 shall be referred to. But buildings above 14.0 metres in height, permission shall be obtained from the State Government.
6. Sub-rule (3) (a) of rule 49 of the Principal Rules shall be substituted with the following:

*(3) The minimum rear open space shall be as follows:

(a) Every building shall have a minimum rear open space at ground level of a width at its narrowest part of not less than that indicated herein below:

<table>
<thead>
<tr>
<th>Height of building (in metres)</th>
<th>Minimum rear open space at its narrowest part (in metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 6.00 metres</td>
<td>1 metre</td>
</tr>
<tr>
<td>Above 6.00 metres but not more than 11.00 metres</td>
<td>1.2 metres</td>
</tr>
<tr>
<td>Above 11.00 metres but not more than 14.00 metres</td>
<td>4 metres</td>
</tr>
</tbody>
</table>

7. Sub-rule (4) (a) of rule 49 of the Principal Rules shall be substituted with the following:

*(4) The minimum side open space shall be as follows:

(a) Every building shall have minimum side open spaces at ground level of width at its narrowest part of not less than that indicated hereinbelow:

<table>
<thead>
<tr>
<th>Height of building (in metres)</th>
<th>Minimum side open space at ground level at its narrowest part (in metres)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Side 1</td>
</tr>
<tr>
<td>Up to 6.00 metres (G+1)</td>
<td>1.0 metre</td>
</tr>
<tr>
<td>Above 6.00 metres up to 11.00 metres</td>
<td>1.2 metres</td>
</tr>
<tr>
<td>Above 11.00 metres but not more than 14.00 metres</td>
<td>1.2 metres</td>
</tr>
</tbody>
</table>

By order of the Governor,

( R. Debbarma)
Under Secretary to the
Government of Tripura
